Manual for Foreign Trade in Services

A guide to filling in questionnaire 1482 "Foreign trade in services"

To the User of the Manual

This Manual is an auxiliary material for those responsible for filling in the questionnaire "Foreign trade in services" (1482). Both general information about foreign trade in services and detailed guidelines for filling in the questionnaire are provided.

The present Manual is the updated edition of the English version of the Manual for Foreign Trade in Services. It has been compiled taking into account feedback from the economic units that tested the foreign trade in services questionnaire, and examples and explanations have been added. The compilers are always open to new suggestions for improvements in the manual, as a great manual can only be compiled in close co-operation with its users.

1. GENERAL INFORMATION ON STATISTICS OF FOREIGN TRADE IN SERVICES

1.1 HOW ARE DATA OF FOREIGN TRADE IN SERVICES COLLECTED

All EU Member States collect data on trade in services. The data are collected on trade in services with both other Member States and third countries (non-Member States).

Economic entities submit foreign trade in services data to the national statistical institute, which produces foreign trade statistics on the basis of the data.

Until 31 December 2020, foreign trade in services data were collected in Estonia by Eesti Pank (central bank of Estonia) from a balance of payments perspective.

As of 1 January 2021, Estonian economic entities submit foreign trade in services data to Statistics Estonia, which also produces statistics on foreign trade in goods. The legal basis for the data collected by Statistics Estonia is the Official Statistics Act. According to sections 28 and 30 of the Act, statistical data must be submitted in due time and to the extent specified. According to the Official Statistics Act (RT I, 11.03.2022, 2 – § 34, 35, 38), Statistics Estonia ensures full protection of the data received from the data provider.

The goal of the change in data collection is to get a better and more comprehensive overview of the export and import of services. This will allow for uniform data coverage, and economic units will receive more accurate, structured information on the indicators of Estonia and all other member states.

By using the published statistics, Estonian economic units can position themselves more accurately in new or existing markets, assess the market share of their service in different countries, find new markets as well as analyse the importance of the service in different countries.

1.2 WHY ARE DATA ON FOREIGN TRADE IN SERVICES NECESSARY?

Data on foreign trade in services are the basis for the compilation of foreign trade statistics. Foreign trade statistics are important both for those planning and making decisions in the public and private sectors at the global as well as at EU level, but also in the Member States and economic units themselves.

Statistics Estonia and Eesti Pank regularly transmit foreign trade statistics data to international organisations such as the UN, OECD, IMF, WTO and many other associations and unions of specific fields.

At the EU level, the data collected with the foreign trade in services questionnaire are necessary for monitoring the EU Single Market, economy and single currency euro as well as for the preparation of political and trade negotiations. The aggregated data of foreign trade in services are transmitted to the statistical office of the European Union (Eurostat).

In Estonia, foreign trade statistics serve as the basis for the compilation of the current account of the balance of payments and the calculation of the gross domestic product (GDP). The most important users of foreign trade in services statistics in the public sector in Estonia are Eesti Pank, the Ministry of Economic Affairs and Communications, Ministry of Rural Affairs, Ministry of Foreign Affairs and Ministry of Finance.

As far as economic entities are concerned, foreign trade data are important for conducting market research. Each year, the number of foreign trade statistics users has grown considerably.

Estonia's export and import statistics are available free of charge to all users in the [statistical database](#) of Statistics Estonia.

1.3 WHO ARE OBLIGATED TO SUBMIT THE QUESTIONNAIRE?

Data on foreign trade in services are to be submitted by economic entities whose turnover of exports or imports of services exceeds the **statistical threshold** set for the reference year. The statistical threshold is set by Statistics Estonia on the basis of the foreign trade data for the previous year.

In the foreign trade in services data, economic entities must report all export/import transactions, i.e. transactions with EU Member States and third (non-Union) countries. **It is necessary to report all transactions between residents and non-residents.** In the case of foreign trade in services, it is most important to note that the transaction is between a resident and a non-resident, while the service may be provided either in Estonia or abroad: foreign trade statistics cover transactions regardless of where the service is provided. **Note:** If the

economic unit is registered in Estonia and provides a service to a non-resident or purchases a service from a non-resident, the sale of the service to a non-resident or the purchase of the service from a non-resident must be reported in the foreign trade in services questionnaire, regardless of how the payment or declaration of invoices is arranged.

Example 1:

An Estonian enterprise provides accounting services to a Finnish enterprise. The Estonian enterprise has registered itself as a VAT payer at the Finnish Tax Office and submits an invoice to the Finnish enterprise for the accounting services provided under the VAT number issued in Finland. In this case, the Estonian enterprise must indicate the sale of accounting services to Finland in the foreign trade in services questionnaire.

Example 2:

An Estonian enterprise has established and registered its subsidiary in Finland and provides accounting services to a Finnish enterprise via its subsidiary. In this case, the Estonian enterprise does not have to show the sale of accounting services to the Finnish enterprise in the questionnaire on foreign trade in services in Estonia. The transaction between a subsidiary registered in Finland and a Finnish enterprise is a transaction between Finnish residents.

Example 3:

An Estonian enterprise has established and registered its subsidiary in Finland and provides accounting services to its subsidiary. In this case, the Estonian enterprise must indicate the sale of accounting services to Finland in the foreign trade in services questionnaire, because it is a transaction between a resident and a non-resident.

In 2024, data on foreign trade in services are to be submitted in the following cases:

- On the basis of 2023 data, the turnover of imports or exports of services exceeded the statistical threshold for 2024. In this case, the data are to be submitted every quarter starting from January 2024 until the end of the reference year. If in 2023, the turnover exceeded the statistical threshold set for 2023, data should be submitted also for the year 2023, starting from the quarter following the quarter when the threshold was exceeded up until the end of 2023.
- The turnover of exports or imports of services exceeds the statistical threshold during the reference year (2024). In this case, the data should be submitted starting from the quarter following the quarter when the threshold was exceeded up until the end of 2024.

In 2024, the value of the statistical threshold for exports or imports of services is **500,000 euros**.

Note: If in 2024 the economic unit's turnover of exports or imports of services exceeds the statistical threshold set for the following year (2025), data are to be submitted in the following year (2025) as well. If the economic unit's turnover does not exceed the statistical threshold set for the following year, it is not necessary to submit data in the following year.

For the calculation of the turnover of exports and imports of services of the economic unit, the information submitted with the questionnaire to Statistics Estonia or the data of the value-added tax return (VAT) submitted to the Tax and Customs Board are taken into account, where:

- **Exports of services: box 3** (Acts and transactions subject to tax at a rate of 0%) – **box 3.1.1** (Intra-Community supply of goods) – **box 3.2** (Exportation of goods)
- **Exports of services to the European Union: box 3.1** (Intra-Community supply of goods and services provided to a taxable person or taxable person with limited liability of another Member State, total) – **box 3.1.1** (Intra-Community supply of goods)
- **Exports of services from the European Union: box 6** (Intra-Community acquisitions of goods and services received from a taxable person of another Member State, total) – **box 6.1** (intra-Community acquisitions of goods)

Note: If the economic unit is registered in Estonia and provides services to or receives services from a non-resident, it is obligatory to report the sale of services to a non-resident or the purchase of services from a non-resident in the foreign trade in services questionnaire, even if

- payment is arranged via bank accounts in foreign countries;
- the VAT return is submitted in another country;

- the services received from / supplied to non-residents have been declared in the VAT return but in a different box than those mentioned above; or
- the services are exempt from VAT but there has been supply of services between a resident and a non-resident.

Example 4:

In 2023, an enterprise sold services to a non-resident in an amount equivalent to 550,000 euros. If the turnover of sold services exceeded 500,000 euros in the third quarter, the enterprise is to submit data for sold and purchased services starting from the fourth quarter of 2023 until the end of the reference year (2024). As in the fourth quarter of 2023 the enterprise's turnover exceeded the statistical threshold for the previous quarter of 2023 (300,000 euros), the data should be submitted also for the fourth quarter of 2023.

In this case, the economic unit receives a notification of the obligation to complete the foreign trade in services questionnaire. The notification is sent to the main user's e-mail address. If the economic unit is obliged to submit other questionnaires to Statistics Estonia, the foreign trade in services questionnaire will be added in eSTAT to the list of questionnaires submitted by the economic unit.

Example 5:

In January to August 2024, the enterprise's exports of services total 520,000 euros and imports 120,000 euros.

In this case, the economic unit was not obliged to provide foreign trade in services data at the beginning of 2024. However, by August (3rd quarter), the exports of services had exceeded the statistical threshold, i.e. 300,000 euros, and therefore the economic unit has to provide foreign trade in services data (both exports and imports) for the 4th quarter of 2024.

Example 6:

In 2023, an enterprise sold services to a non-resident in an amount equivalent to 550,000 euros and purchased services from the non-resident in an amount equivalent to 640,000 euros.

In this case, the enterprise is to submit data on both sold and purchased services in 2024 as well.

The obligation to submit data can be checked at <https://www.stat.ee/en/submit-data/obligation-to-submit-data>. By entering the unit's registry code and selecting the relevant period, it is possible to obtain information on what data the unit is required to provide in the selected year. If you click on the foreign trade in services questionnaire link, more information will appear on how to complete it.

Economic units whose turnover exceeds the statistical threshold in the reference period (e.g. January–March 2024) are sent a notification letter stating the need to complete the foreign trade in services questionnaire. The letter is sent to the e-mail address of eSTAT main user or to the unit's general e-mail address.

In the case of a VAT group, the foreign trade in services questionnaire must be completed by a representative person. The obligation of other economic entities in the VAT group to provide data are suspended. Foreign trade in services information must be provided by the VAT group if the turnover of exports and imports of services exceeds the **statistical threshold** established for the reference year. The Data Acquisition and Processing Department of Statistics Estonia aggregates the turnover of the group members' exports and imports of services in the previous period. If economic entities in the VAT group wish to provide data on foreign trade in services independently, Statistics Estonia should be informed accordingly.

In case of deletion of a VAT group at the Tax and Customs Board, the obligation to provide foreign trade in services data is passed on to all economic entities in the group.

Foreign trade in services data are not required to be provided by persons who are exempt from submitting VAT returns. These are private and legal persons who are not liable for VAT.

1.4 WHO IS RESPONSIBLE FOR SUBMITTING QUESTIONNAIRES?

The questionnaire may be submitted by:

- economic entities themselves or their parts/subdivisions;
- parent economic entities (may be located abroad);
- representatives of economic entities (accounting companies etc.).

If it is more convenient for an economic unit to submit the data on its subsidiaries or subdivisions separately instead of a consolidated data set, the economic unit can do so, but first the economic unit should co-ordinate with Statistics Estonia the reporting entities, their contact persons and addresses.

If another person (accounting company) fills out the questionnaire on behalf of an economic unit, it is advisable that the person send the statistical data to the economic entity also, so that the economic unit can check the accuracy of the submitted data and is able to answer any questions Statistics Estonia might have.

In any case, the economic unit with the reporting obligation is responsible for the accuracy of the data.

1.5 WHEN ARE THE QUESTIONNAIRE SUBMISSION DUE DATES?

This is a quarterly questionnaire and is submitted separately for each quarter. The data should be submitted to Statistics Estonia at the latest **by the 18th calendar day** following the reference period for all transactions with non-resident partners conducted in the previous quarter.

Example 1:

If the enterprise has purchased services from or sold services to a non-resident partner from January to March, the data must be submitted to Statistics Estonia, i.e. the foreign trade in services questionnaire must be completed by 18 April.

Reference period	Period of transactions reported in the questionnaire	Due date for filling in the questionnaire
1st quarter	1 January – 31 March	18 April
2nd quarter	1 April – 30 June	18 July
3rd quarter	1 July – 30 September	18 October
4th quarter	1 October – 31 December	18 January

If the data are not submitted by the due date, a reminder is sent to the person responsible for data submission. eSTAT sends an automatic e-mail to the main user or general e-mail address of the economic unit, unless otherwise specified. Automatic reminders are sent 5 days before and 3, 7 and 20 days after the questionnaire due date.

At the end of the month, a precept is sent to the most important economic units that have not submitted the questionnaire. For the precept, the e-mail address is taken from the commercial register. The economic unit to which a precept has been issued must submit the questionnaire in 5 working days. If the unit fails to submit the questionnaire during this time, a claim for a non-compliance levy is forwarded to a bailiff.

Issuance of a precept for failure to submit data and for submitting incorrect data is provided for in section 39 of the Official Statistics Act:

(1) The producer of official statistics shall exercise state and administrative supervision over compliance with the requirements provided for in this Act and legislation established on the basis thereof.

(3) Upon exercise of state supervision specified in subsection (1) this section, the producer of official statistics may apply the specific state supervision measures provided for in § 30 of the Law Enforcement Act on the basis of and pursuant to the procedure provided for in the Law Enforcement Act.

The payment of the non-compliance levy does not exempt the unit from the obligation to submit data.

1.6 HOW LONG IS THE REPORTING PERIOD?

In general, the obligation to submit data lasts **up to the end of the reference year**, even if the total of transactions during the reference period falls below the statistical threshold.

Respondents are not required to submit data for the year following the reference year if total transactions in services in the reference year do not exceed the statistical threshold set in the following year.

If an economic unit has temporarily stopped its activity, the economic unit has been liquidated, or the data could not be submitted by the due date, Statistics Estonia should be informed by e-mail (klienditugi@stat.ee).

1.7 HOW IS CONFIDENTIALITY OF THE SUBMITTED DATA ENSURED?

According to sections 34, 35 and 38 of the Official Statistics Act, Statistics Estonia guarantees the complete protection of the data submitted by respondents. The data are used only for statistical purposes. In order to ensure the confidentiality of foreign trade in services data, the data shall be disclosed or transmitted without characteristics enabling the respondent to be identified, in the form of aggregated data of at least three respondents. The contents of the cell (nest) enabling identification and the linked cells are covered up. If the nest of the data to be published contains data of fewer than three economic units, these are covered up, along with the cells that allow indirect identification of the original data in the "confidential nest".

1.8 WHY DOES STATISTICS ESTONIA NOT USE DATA FROM THE TAX AND CUSTOMS BOARD?

The data collected by the Estonian Tax and Customs Board only provide information about the economic unit's total turnover of intra-EU foreign trade in services and about the sale of services by country. But Statistics Estonia must collect and publish data by type of service, country (incl. non-EU countries), cost of service, and mode of supply. The Tax and Customs Board does not collect data on foreign trade in services from economic units in such detail (there is no information available about service codes, non-resident's country code, cost of service, and mode of supply).

2. FOREIGN TRADE IN SERVICES AND SUBMISSION OF DATA

2.1 CONCEPTS

Service	<p>Services are the result of a production activity that changes the conditions of the consuming entities, or facilitates the exchange of products or financial assets. Services are not generally separate items over which ownership rights can be established and cannot generally be separated from their production.</p> <p>Services cannot be stored or produced in advance; they can only be delivered in case of contact between the service provider and the purchaser. Services may not retain their form and if the service is not suitable for the customer, there may be individual incompatibilities at the time the service is provided.</p> <p>Services can be either addressed to persons (notary, doctor, cinema) or objects (repair shop, advertising agency, surveillance service). Services can be provided to both individuals and groups of people.</p>
Foreign trade in services	Foreign trade in services are transactions between a resident (your economic unit) and non-residents (economic units and natural persons).
Economic unit	Enterprise (company, sole proprietor) entered in the Commercial Register in Estonia or abroad or a non-profit institution (non-profit association, foundation, government institution, local government institution) registered in Estonia or abroad.
Resident (your economic unit)	<p>A person with a permanent residence in Estonia or a legal person registered in Estonia:</p> <ol style="list-style-type: none"> 1. state authorities or agencies of the Republic of Estonia in the broadest sense (legislative, executive and judicial bodies or their agencies, and constitutional institutions), and local governments or their agencies; 2. Estonian diplomatic, consular or other official representations in foreign countries, and representative offices of other Estonian institutions or organisations abroad which are not engaged in any economic or commercial activity; 3. legal persons in public law and their agencies formed under the laws of the Republic of Estonia; 4. legal persons in private law registered in the Republic of Estonia, or their representative offices (including cross-border service providers); 5. companies (Societas Europaea) or cooperatives (Societas Cooperativa Europaea) registered in the Republic of Estonia under the statute for a European company, or their representative offices; 6. branches of foreign legal persons registered in the Republic of Estonia; 7. Estonian citizens residing in the Republic of Estonia; 8. aliens residing in the Republic of Estonia who hold a permanent residence permit or a temporary residence permit for at least one year; 9. persons specified in clauses 7 or 8, studying or undergoing medical treatment abroad, irrespective of the duration of their studies or medical treatment; 10. persons specified in clauses 7 or 8 who are members of a ship crew, seasonal or cross-border workers abroad, irrespective of the duration of their stay abroad; 11. diplomats, military personnel, staff of consular or other official representations of the Republic of Estonia and their family members abroad who enjoy immunity and diplomatic privileges.

Non-resident	A legal person established abroad or a natural person whose habitual residence is abroad. Branches and subsidiaries of non-resident enterprises located in Estonia are Estonian residents. Branches and subsidiaries of Estonian enterprises located abroad are non-residents in relation to Estonian enterprises. Embassies of foreign countries and representations of international organisations located in Estonia are also non-residents.
Sale of service	Exports of services, i.e. sale of services to non-residents in Estonia or abroad. The term “sale of service” is used in the data collection phase and the term “exports of services” is used when the data are published.
Purchase of service	Imports of services, i.e. purchase of services from non-residents in Estonia or abroad. The term “purchase of service” is used in the data collection phase and the term “imports of services” is used when the data are published.

2.2 WHAT IS FOREIGN TRADE IN SERVICES AND WHICH SERVICES ARE COVERED?

The quarterly foreign trade in services questionnaire should reflect all transactions relating to the exports (hereinafter “**sale of service**”) and imports of services (hereinafter “**purchase of service**”) by type and country.

NOTE: In 2024, the main mode of supply field in the questionnaire is optional.

Foreign trade in services is when an economic unit that is a resident of Estonia (hereinafter referred to as **resident or R**) and an economic unit registered abroad (a non-resident from the point of view of an Estonian resident – hereinafter referred to as **non-resident or NR**) engage in trade in services. In the case of sale of service, an Estonian resident receives compensation for services rendered to non-residents, including economic entities belonging to the same group abroad. In the case of purchase of service, an Estonian resident pays a non-resident for the purchased services. The service does not have to cross national borders and can be provided both in Estonia and abroad.

Estonian residents are economic entities registered in the Estonian commercial register, whose economic activity takes place in Estonia and who have a place of business in Estonia (office, structures, production facilities, etc.). Other economic entities, including subsidiaries and branches of Estonian economic units abroad, are defined as non-residents. International organisations such as the Nordic Investment Bank (NIB) and EU institutions are also classified as non-residents.

The questionnaire should reflect manufacturing, trade, maintenance and repair services, transport and construction services, financial and insurance services, royalties and license fees, telecommunications, computer and information services, travel and health services, other business services, and personal, cultural and recreational services (see [Annex 1. NACE economic activities, service codes and modes of supply](#) and [3.2 CODE OF SERVICE AND OTHER TRANSACTION](#)).

The basis for the classification of services at the time of publication is the Extended Balance of Payments Services Classification 2010 (EBOPS 2010), which classifies services into 12 main groups, which may in turn have sub-groups. According to this classification, the following services may be sold to and purchased from non-residents:

EBOPS code	Specification of type of service
SA	Manufacturing services on physical inputs owned by others
SB	Maintenance and repair services n.i.e.
SC	Transport
SD	Travel
SE	Construction
SF	Insurance and pension services
SG	Financial services
SH	Charges for the use of intellectual property n.i.e.
SI	Telecommunications, computer and information services
SJ	Other business services
SK	Personal, cultural and recreational services
SL	Government goods and services n.i.e.

In [chapter 3.2 CODE OF SERVICE AND OTHER TRANSACTION](#), the service codes are described on the basis of the above Extended Balance of Payments Services Classification 2010 (EBOPS 2010).

2.3 HOW TO SUBMIT DATA TO STATISTICS ESTONIA?

The data on foreign trade in services can be submitted to Statistics Estonia **electronically** using the online environment eSTAT.

- For using eSTAT, the economic unit must submit to Statistics Estonia a request for the creation of a main user account. The guide for submitting the request is available on the website of Statistics Estonia at https://www.stat.ee/sites/default/files/2023-06/eSTATi_vk_juhend_l%C3%BChEN_1.pdf. More information can be obtained by calling +372 625 9300.
- eSTAT can be accessed at <https://estat.stat.ee/valisportaal/?language=en>. We recommend that you use an ID card or Mobile ID to log in.
eSTAT can be used with Mozilla Firefox, Internet Explorer and Google Chrome browsers. When logging in, make sure that the browser allows pop-up windows.
- In eSTAT, it is possible to enter data manually record by record (see [2.4 Filling in the foreign trade in services questionnaire](#)), or upload data to eSTAT as a CSV or Excel table.
- To upload data to eSTAT as a CSV or Excel table, click on the download icon  at the top right corner of the table. First, download the necessary CSV or Excel template by clicking on the corresponding link. Then save the file to your computer to enter the data in the file manually or download the data from an accounting program. In order to upload tables to eSTAT, use the relevant upload link. Clicking on the link opens the data submission window. Select the data file you want to submit from your computer and upload the file by clicking "Upload file". After uploading the data, you can check the data and submit the questionnaire. Formatting errors during the uploading process mean that the file is not in accordance with the specified form.
- It is important to know the following:
 - 1) the template of the CSV table should not be altered;
 - 2) the separator should be a semicolon, not a space, full stop, etc.;
 - 3) the field "Record number" should be completed in the CSV file and each number should be unique.
- If you want to upload additional data using a CSV or Excel table, upload the data you have already provided and the additional data in the same table. **NOTE:** When uploading a CSV or Excel file containing only additional data, the previously submitted data are deleted.

2.4 FILLING IN THE FOREIGN TRADE IN SERVICES QUESTIONNAIRE

Once you have entered the page of your economic unit in eSTAT, click on **Foreign trade in services** in the list of active questionnaires.

You can then view all the questionnaires to be submitted in the current year, their due dates and status. In 2024, there is one foreign trade in services questionnaire with the code 14822024 – "Foreign trade in services". On the questionnaire page, select the period for which you are submitting data. There are four periods: 1) 2024-I; 2) 2024-II; 3) 2024-III; 4) 2024-IV.

At the end of each line of the questionnaire, you'll see:

-  – click on this icon to see the completed questionnaire.
-  – click on this icon to start filling in the questionnaire or to correct the data.

Select the correct quarterly questionnaire you want to fill in and click on .

A quarterly view of the services questionnaire will open. Click on **"Show more"** to open the upper part of the header where you can see all the information about this questionnaire. In addition, there are separate buttons:

- **Submit comment about period** – clicking on it opens a window where you can write a free-text comment (up to 250 characters). Once you have added your comments, press **"Save"** and the window closes. If you do not want to write a comment, you can close the window by clicking on **"X"** in the right-hand corner.
- **View the instructions** – the questionnaire manual, questionnaire instructions and instructions on the questionnaire checks are available here. To close the window, click on **"X"** in the top right-hand corner.

Depending on the activity of the economic unit, one of the following will open:

- **Form 1 (Foreign trade in services).** This form is filled in by all economic entities, except for insurance enterprises (NACE codes 65111, 65121, 66211 or 66221).
- **Form 2 (Foreign trade in services of insurance enterprises).** This form is filled in by economic entities active in the economic activity of insurance (NACE codes 65111, 65121, 66211 or 66221)

To start filling in the questionnaire manually, click **"Add table row"**.

Next, a window for entering transaction data opens. To facilitate answering the questionnaire, you can select both **"Code/value"** and **"Name"** column information from the drop-down menus. For example, by selecting a code in the **"Code/value"** column, the name of the corresponding code is automatically displayed and vice versa.

Clicking on  in the **"Code/value"** column will display available options. If you want to enter information about sale of services, click on  in "Transaction in service" row in **"Code/value"** column and then on the option **"M. Sale of service"**. In this column, "M" is displayed, while in the "Name" column "Sale of service" will be displayed. You can also make a selection by clicking on  in the "Name" column, and the "Code/value" column will be automatically filled based on your selection.

In the same way, you can fill in all data fields where options are given. Further explanations of the data fields are in [Chapter 3. DATA FIELDS IN THE FOREIGN TRADE IN SERVICES QUESTIONNAIRE](#).

To fill in the field **"Total cost of service"**, enter the corresponding cost of service. If you want to comment on the transaction, you can do so in the row **"Remark"**.

A. Foreign trade in services

Saved rows: 0

Column no.	Name	Code of variable	Code/value	Name

Close

Add row to the table

To simplify filling in the questionnaire, a search feature has been added to each question, which can be used by clicking on  **"Search in the expanded window"**. For example, if you want to search the transaction code using a keyword, click on the **"Code/value"**  in the **"Code of service and other transaction"** column, which opens the view **"Search from classification – Code of service and other transaction"**. For example, if you enter the keyword "sea", all service codes containing the word are displayed. If you have found the appropriate code, click on **"Select code"**, and the window closes and the code is displayed in the **"Code/value"** data field. If you do not want to make a selection here, click **"Back"** – the window closes and you can continue entering transaction data.

“The main mode of supply” and “Share of the main mode of supply” are optional fields. You can:

Search from classification - Code of service and other transaction

You can search by code or word section. Click on the magnifying glass to confirm your search or press "Enter" on your keyboard.

Code	Description	Unit	
T7300000	Advertising and market research services	euro	Select code
T72TOM00	Purchase and sales transactions in rights to use scientific (research-based) intellectual property	euro	Select code
T502YK00	Rental of sea transport vehicle with crew for goods freight	euro	Select code
T501YR00	Rental of sea transport vehicle with crew for passengers transport	euro	Select code
T7200000	Scientific research and development services	euro	Select code
T502V000	Sea and coastal freight transport services (incl. forwarding) abroad / to abroad	euro	Select code
T502E000	Sea and coastal freight transport services (incl. forwarding) in Estonia / to Estonia	euro	Select code
T501R000	Sea and coastal passenger water transport services by a resident carrier	euro	Select code
T6312000	Web portal search engine services	euro	Select code

Prev 1 Next

- Select the given figures – in this case, your selection will be displayed later in the questionnaire.
- Leave data fields empty – in this case, fields will remain empty in the questionnaire. If you filled in field “The main mode of supply”, but left field “Share of the main mode of supply”, then in the data processing phase, “Share of the main mode of supply” is considered to be 100%, i.e. the whole service was provided in the way you have indicated in “The main mode of supply” field.

Once the data fields have been filled in, click on “Add row to the table”. If any of the mandatory fields are empty or errors have occurred when entering the data, a warning or error message is displayed.

At the same time, error fields are marked. By clicking on:

- **Fix** – you can fill in the empty fields or correct the already entered data;
- **Clean** – all the entry details are deleted and you can start re-entering the data.

If there were no errors, a window for a new entry will open immediately. If you wish to view the questionnaire while filling it in or you have finished entering data, click on “Close” and review the completed questionnaire.

If you want to stop entering data and continue later, click on “Exit”, in which case you can continue filling in the questionnaire in progress whenever it is suitable for you. If all data have been entered, click on the “Check” button.

Once a check has been carried out, information on errors is displayed on the screen. If there are errors, they must be corrected, and if there are no errors, click on the “Forward” button.

In order to submit the questionnaire, click on the “Confirm” button.

If you have any questions while filling in the questionnaire, you can submit these to Statistics Estonia’s chatbot Iti. Click on Iti’s picture or on the question “How can I help you?” A chat window opens where you can write your question.

2.5 HOW TO CORRECT SUBMITTED DATA?

If errors are identified in the submitted data, corrections should be sent to Statistics Estonia.

If the data were submitted via the online environment eSTAT, open the file for the relevant quarter by clicking on  (Edit). By clicking on  (Open row) next to the number of the record that needs to be corrected, the selected item will be displayed in the input table. All corrections should be made in this table and saved by clicking on the button “Save row” below the input table. An item can be deleted by first clicking on the number of the relevant item and then on the button “Delete” below the input table. If a new item needs to be inserted, click on “Add table row”, then add the data into the empty table displayed and click on “Add row to the table” to save the data. If all corrections or additions have been made, click on “Check”. If no errors are found click on the button “Forward” and then “Confirm”. The new, corrected data are then submitted.

2.6 SHOULD QUESTIONNAIRES BE SUBMITTED EVEN IF THERE WERE NO TRANSACTIONS?

Foreign trade in services data must be submitted even if an economic unit has not made any transactions with a non-resident during the relevant quarter. Otherwise, non-response and the absence of transactions cannot be distinguished. If there were no trade transactions in the relevant quarter, Statistics Estonia should be informed about that by sending an e-mail to klienditugi@stat.ee or by filing a **nil-report** in eSTAT.

In order to complete the nil-report in eSTAT, go to the foreign trade in services questionnaire and click on the gear symbol, which can be found near the header "Questionnaire data". Clicking on "Confirm all periods" opens the period confirmation view. Select the reason for confirming the questionnaire, the period or periods to confirm and add a more detailed description. Click on "Confirm" to submit the relevant questionnaire periods.

2.7 RECOGNITION OF CREDIT INVOICES

If data on foreign trade in services have not yet been provided or a credit invoice is issued to correct an incorrect invoice, the value of the service in the foreign trade in services questionnaire must be changed on the basis of the credit invoice. If data have already been submitted, a correction must be sent to Statistics Estonia. If the credit invoice relates to a bonus or discount to the customer, questionnaire data need not be corrected.

Note: It is not necessary to send a correction to Statistics Estonia if the amount indicated on the credit invoice is less than 5,000 euros. The data for the quarter in which the service was purchased or sold should be corrected even if the credit invoice was submitted later.

If a credit invoice covers all the services purchased or sold by the economic unit (e.g. discounts, etc.), rather than one particular service, this need not be reflected in the questionnaire.

Example 1:

An Estonian construction enterprise (EH3) sells construction services to a Finnish enterprise (FI1) and constructs a house in Finland as ordered by the Finnish enterprise. The Finnish enterprise pays EH3 150,000 euros for the construction service and for the cost of goods and services purchased by EH3 (construction goods from Estonia for 10,000 euros and from Finland for 20,000 euros). The house is handed over to the client in January and the Finnish enterprise pays the agreed amounts on the basis of the invoices submitted in accordance with the contract 45 days after the invoice was submitted.

In February, problems occurred with water supply in the house and it turned out that the Estonian construction enterprise had failed to perform some of the insulation work. During negotiations between the parties, it was agreed that the Finnish enterprise orders repairs and pays for these. As a result, the cost of the construction works of the Estonian construction enterprise would be reduced by 6,000 euros, for which the Estonian construction enterprise will issue a credit invoice in March.

The Estonian construction enterprise must correct the data for the 1st quarter and change the cost of the construction service to 144,000 euros.

Example 2:

During the year, an Estonian enterprise has purchased various services (legal, financial, management consultations, software licenses, etc.) from a German consultancy enterprise. At the end of the year, a discount is given on all the services purchased from Germany during the year. As this correction is not related to a particular service, there is no need to correct the foreign trade in services questionnaire.

Note: Do not use negative values in the case of credit invoices.

2.8 ACCUMULATION OF SERVICES IN THE QUESTIONNAIRE

In the foreign trade in services questionnaire, there is no need to declare every invoice separately. If an economic unit has sold or purchased the same type of service from the same foreign country during the same reference period (quarter), it is possible to accumulate the invoice values and record them in an entry in the questionnaire.

Accumulation is allowed only if the **transaction in service, code of service and other transaction**, and the **code of the non-resident's country** are the same.

3. DATA FIELDS IN THE FOREIGN TRADE IN SERVICES QUESTIONNAIRE

In the foreign trade in services questionnaire, there are seven data fields, which can be divided into four categories:

- Mandatory fields – transaction in service (1), code of service and other transaction (2), code of non-resident's country (3) and total cost of service (4). Mandatory fields are marked with an asterisk (*);
- Optional fields – the main mode of supply (5), share of the main mode of supply (6) and remark (7);
- Fields related to classification – transaction in service (1), code of service and other transaction (2), code of non-resident's country (3), the main mode of supply (5), share of the main mode of supply (6).
- Numeric fields – total cost of service (4).

3.1 TRANSACTION IN SERVICE

There are two types of transactions in services:

- Sale of service (M) – sale of service to a non-resident, i.e. exports;
- Purchase of service (O) – purchase of service from a non-resident, i.e. imports.

3.2 CODE OF SERVICE AND OTHER TRANSACTION

The **eight-digit code of service and other transaction** from the classification "Foreign trade in services 2023" is entered in the field. The transaction code is a combination of letters and numbers describing the service provided.

Transaction code							
T	5	0	4	V	0	0	0
Type of transaction	Beginning of CPA code		Specifications				
T. Data collected with the services questionnaire	Two digits according to NACE		Whether the service is provided to a resident (R) or a non-resident (NR)				
	44		Whether the service is provided abroad or in Estonia				
	Goods purchased by an enterprise providing construction services (from Estonia and abroad)		Purchase of goods from Estonia (E) and abroad (V) in the case of providing construction services				
			Specification of service				
			Subsequent NACE digits (if the code needed to be specified)				
		Other specifications (reflected in the name)					

The service transaction code always starts with "T", which indicates that information is collected with the services survey.

The second and third digit of the code are the first and second digit of the CPA (Statistical classification of products by activity) code. If the respondent purchases or sells services within its economic activity and knows the beginning of the activity's NACE code, it is easy to find the appropriate transaction code. An exception is the purchase of goods related to construction services from Estonia and abroad or sale of goods related to construction services to non-residents where the second and third place of the code is "44" (there is no such NACE or CPA code), followed by letters in the fourth and fifth place to distinguish between purchases of goods from Estonia and abroad (EK – purchase of goods from Estonia; VK – purchase of goods from abroad). The sixth place is a letter that identifies whether the construction goods were purchased or sold for a construction project in Estonia (E) or abroad (V).

Fourth to eighth places of the code describe the features of the service and are reflected in the service's description. They describe, where appropriate:

- whether the service is purchased or sold in Estonia or abroad (e.g. construction services can be sold to non-residents by constructing buildings in Estonia or abroad);
- whether the service is provided by a resident or non-resident (e.g. in the case of passenger transport services, international passengers can be carried by both a resident and a non-resident, but the non-resident is paid for the carriage of passengers);
- whether the means of transport is rented with or without crew;
- additional CPA code digits have been used here to describe the service more accurately.

The list of service and other transaction codes, descriptions and the relationship with NACE are provided in [Annex 1. NACE economic activities, service codes and modes of supply](#).

Types of service (based on EBOPS 2010 classification) and the corresponding service codes and descriptions are presented in the following table. Economic entities' codes of service and other transaction related to insurance differ depending on whether the principal activity is insurance or not. The economic entities whose principal activity is not insurance can select the insurance code: T65SKH00 (in case of services sales) or T65TKM00 (in case of services purchases).

The economic entities whose principal activity is insurance (NACE codes 65111, 65121, 66211 or 66221) need to report insurance-related transactions using seven different codes (the names correspond to those used on the balance of payments reporting form of Eesti Pank). To facilitate selecting the code of service, the last two digits of the code are the same as used on the balance of payments reporting form of Eesti Pank; e.g. if the code of direct insurance premiums on the reporting form is 71, then in the foreign trade in services the relevant code is T6500K71.

Types of service and corresponding service codes and descriptions

Code of service	Name of service	Description of service
SA	Manufacturing services on physical inputs owned by others	
T1000000	Food processing services	<p>Processing service is an activity which results in new products or changes in the characteristics of goods. Processing services are, for example:</p> <ul style="list-style-type: none"> - processing of goods (reprocessing); - assembly; - packing; - labelling (tagging); - packaging, etc. <p>In this case, the supplier of processing service does not own the processed goods. Storage or distribution may co-occur with processing service but are not considered processing services.</p> <p>The cost of service may include the cost of materials and services added to the goods by the processor according to an agreement between the processor and contracting entity. The purchase/sale of processing service may take place in Estonia or abroad.</p> <p>Sale of service – a sum that a non-resident pays to your economic entity for processing service. The goods that are sent for processing and/or are created as a result of processing belong to the non-resident.</p> <p>Purchase of service – a sum that your economic unit pays to a non-resident for processing service. The goods that are sent for processing and/or are created as a result of processing belong to a resident of Estonia, i.e. your economic unit.</p> <p>Excluding:</p> <ul style="list-style-type: none"> * cost of processed goods * construction of buildings/structures assembled from components, e.g. assembling of prefabricated constructions (<i>reported under SE "Construction", items SE1 or SE2</i>) * packaging/repackaging of goods by transport company and labelling services for transport (<i>reported under SC "Transport", items SC13, SC23, SC3B3, SC3C3, SC3G - transport supporting and auxiliary services</i>) * printing of books, leaflets and the like, if the service supplier owns the materials necessary for printing (<i>not reported in the questionnaire, considered goods</i>)
T1100000	Beverage processing services	
T1200000	Tobacco processing services	
T1300000	Textile processing services	
T1400000	Processing services of apparel	
T1500000	Processing services of leather and leather products	
T1600000	Processing services of wood and products of wood and cork	
T1700000	Processing services of paper and paper products	
T1900000	Processing services of coke and refined petroleum products	
T2000000	Processing services of chemicals and chemical products	
T2100000	Processing services of basic pharmaceutical products and pharmaceutical preparations	
T2200000	Processing services of rubber and plastic products	
T2300000	Processing services of other non-metallic mineral products	

Code of service	Name of service	Description of service
T2400000	Processing services of basic metals	* waste treatment (<i>reported under SJ32 "Waste treatment and de-pollution, agricultural and mining services"</i>)
T2500000	Processing services of fabricated metal products	More detailed explanations and examples can be found in chapter 4.4 Processing services (code of service: T1000000–T1700000; T1900000–T3200000; T8292000) .
T2600000	Processing services of computer, electronic and optical products	
T2700000	Electrical equipment processing services	
T2800000	Processing services of machinery and equipment n.e.c.	
T2900000	Processing services of motor vehicles, trailers and semi-trailers	
T3000000	Processing services of other transport equipment	
T3100000	Processing services related to furniture manufacturing	
T3200000	Processing services related to other manufacturing	
T8292000	Packaging services	
SB	Maintenance and repair services not included elsewhere	
T3310000	Repair services of metal products, machinery and equipment	Maintenance and repair services of machinery and equipment in Estonia or abroad refer to maintenance and repair of machinery, equipment, transport equipment and other goods owned by non-residents and performed by residents (or vice versa). Maintenance and repair services may be supplied in the country of the service supplier or abroad. Sale of service – a sum that a non-resident client pays to your economic unit for maintenance and repair services. The non-resident client owns the goods before and after supplying maintenance and repair services. Purchase of service – a sum that your economic unit pays to a non-resident economic unit for maintenance and repair services. Your economic unit owns the goods before and after supplying maintenance and repair services.
T4520000	Maintenance and repair services of motor vehicles	
T4540500	Maintenance and repair services of motorcycles	
T9512000	Repair services of communication equipment	
T9520000	Repair services of personal and household goods	
		The cost of maintenance and repair services is the fee for the service, not the difference in the cost of goods before and after maintenance and repair services. The cost of service includes the cost of products/materials/spare parts/services bought by the maintenance or repair service provider and included on the same invoice as the cost of maintenance and repair services. If the cost of products/materials, etc. are invoiced separately, it is not reported in the questionnaire (considered goods). Including: * coating tarpaulin installation Excluding: * maintenance and repair of buildings (<i>reported under SE "Construction", item SE1 or SE2</i>) * maintenance and repair of airport and railway facilities (<i>reported under SE "Construction", item SE1 or SE2</i>) * maintenance and repair of computers and networks (<i>reported under SI "Telecommunications, computer and information services", item SI2 - Computer services</i>) * maintenance and repair of drilling rigs and oil rigs (<i>reported under SJ "Other business services", item SJ323 - Services incidental to mining and oil and gas extraction</i>) * cleaning of transport equipment (<i>reported under SC "Transport", items SC13, SC23, SC3B3, SC3C3, SC3G - Other supporting and auxiliary services</i>) * cleaning of buildings and structures on the outside (<i>reported under SE "Construction", item SE1 or SE2</i>) * cleaning of buildings and structures on the inside (<i>reported under SJ "Other business services", item SJ35 - Other business services n.i.e.</i>)

Code of service	Name of service	Description of service
SC	Transport	
SC1	Sea transport	
SC11	Sea Transport - Passenger	
T501MR00	Sea and coastal passenger water transport services by a non-resident carrier	Sea and coastal passenger transport Sale of service – a sum that is paid to your economic unit for the transport of non-resident passengers (the cost of tickets of non-resident passengers) or for passenger transport purchased from non-resident carriers and passenger transport included in travel packages.
T501R000	Sea and coastal passenger water transport services by a resident carrier	Purchase of service – a sum that your economic unit pays to a non-resident carrier for passenger sea transport.
T501YR00	Rental of sea transport vehicle with crew for passengers transport	Including: * goods sold on board for consumption during sea transport, i.e. serving passengers on international lines – income from serving non-resident passengers, incl. the expenditures of on-resident passengers on board of the vessel, e.g. in a restaurant, bar, store, etc. (may be estimated) * transport included in holiday and tour packages * transport of passenger baggage * renting/leasing ships with crew for passenger transport
		Excluding: * transport of non-resident passengers in Estonia if the carrier is a resident (<i>not reported in the questionnaire</i>) * transport of Estonian passengers outside Estonia if the carrier is a resident (<i>not reported in the questionnaire</i>) * renting ships without crew for passenger transport (<i>reported under SJ "Other business services", item SJ33 - Operating leasing services</i>) * financial leasing of ships (<i>not reported in the questionnaire</i>) * purchase and sale of fuel and supplies (<i>not reported in the questionnaire</i>) More detailed explanations and examples of how to use these codes for travel services can be found in chapter 4.1 Reporting travel services in the questionnaire , and for transport services in chapter 4.3 Reporting transport services in the questionnaire .
SC12	Sea Transport - Freight	
T502E000	Sea and coastal freight transport services (incl. forwarding) in Estonia / to Estonia	Sea and coastal freight transport (excl. supporting and auxiliary transport services). Sale of service – a sum that a non-resident client pays to your economic unit for sea freight transport.
T502V000	Sea and coastal freight transport services (incl. forwarding) abroad / to abroad	Purchase of service – a sum that your economic unit pays to a non-resident economic unit for sea freight transport.
T502YK00	Rental of sea transport vehicle with crew for goods freight	Including: * cabotage by sea * container transport * post and package transport by sea on behalf of post and courier companies * renting sea tankers and ships with crew
		Excluding: * renting/leasing movable containers (<i>reported under SJ "Other business services", item SJ33 - Operating leasing services</i>) * renting/leasing immovable containers for storage of goods (<i>reported under SC "Transport", item SC13 - Sea Transport - Other</i>) * post and package transport by post and courier companies (<i>reported under SC "Transport", item SC4 - Post and courier services</i>) * renting/leasing ships without crew for freight transport (<i>reported under SJ "Other business services", item SJ33 - Operating leasing services</i>) * financial leasing of ships (<i>not reported in the questionnaire</i>) * purchase and sale of fuel and supplies (<i>not reported in the questionnaire</i>) More detailed explanations and examples can be found in chapter 4.3 Reporting transport services in the questionnaire .

Code of service	Name of service	Description of service
SC13	Sea Transport - Other	
T5222000	Services incidental to water transport (incl. storage services of transport companies)	<p>Supporting and auxiliary transport services that are not directly connected to sea and coastal transport of passengers and freight.</p> <p>Sale of service – a sum that a non-resident client pays to your economic unit for services to support passenger or freight transport.</p> <p>Purchase of service – a sum that your economic unit pays to a non-resident economic unit for services to support passenger or freight transport.</p> <p>Including:</p> <ul style="list-style-type: none"> * cargo handling * port dues * storage and warehousing * renting/leasing storage facilities (also immovable containers and tanks for storage of goods) * packaging/repackaging goods by transport company when providing transport service * towing, pilotage and navigational services * operational services by harbour or port related companies * cleaning performed in ports and airports on transport equipment * salvage and rescue operations at sea * agents' fees associated with passenger and freight transport (e.g., freight forwarding and brokerage services) * ferry services, bridge, tunnel and road fees <p>Excluding:</p> <ul style="list-style-type: none"> * repair of port facilities (<i>reported under SE "Construction", item SE1 or SE2</i>) * maintenance and repair of ships (<i>reported under SB "Maintenance and repair services"</i>) * purchase and sale of fuel and supplies (<i>not reported in the questionnaire</i>) <p>More detailed explanations and examples can be found in chapter 4.3 Reporting transport services in the questionnaire.</p>
SC2	Air transport	
SC21	Air transport - Passenger	
T511MR00	Passenger air transport services by a non-resident carrier	<p>Passenger air transport.</p> <p>Sale of service – a sum that is paid to your economic unit for the transport of non-resident passengers (the cost of tickets of non-resident passengers) or for passenger transport purchased from non-resident carriers and passenger transport included in travel packages.</p>
T511R000	Passenger air transport services by a resident carrier	<p>Purchase of service – a sum that your economic unit pays to a non-resident carrier for passenger air transport.</p>
T511YRV0	Rental of air transport vehicle with crew for passengers transport	<p>Including:</p> <ul style="list-style-type: none"> * goods sold on board for consumption during air transport, i.e. serving passengers on international lines – income from serving non-resident passengers, incl. the expenditures of non-resident passengers on board, e.g. in a restaurant, bar, store, etc. (may be estimated) * transport included in holiday and tour packages * transport of passenger baggage * renting/leasing aircraft with crew for passenger transport <p>Excluding:</p> <ul style="list-style-type: none"> * transport of non-resident passengers in Estonia if the carrier is a resident (<i>not reported in the questionnaire</i>) * transport of Estonian passengers outside Estonia if the carrier is a resident (<i>not reported in the questionnaire</i>) * renting/leasing aircraft without crew for passenger transport (<i>reported under SJ "Other business services", item SJ33 - Operating leasing services</i>) * financial leasing of aircraft (<i>not reported in the questionnaire</i>) * purchase and sale of fuel and supplies (<i>not reported in the questionnaire</i>) <p>More detailed explanations and examples of how to use these codes for travel services can be found in chapter 4.1 Reporting travel services in the questionnaire, and for transport services in chapter 4.3 Reporting transport services in the questionnaire.</p>

Code of service	Name of service	Description of service
SC22	Air transport - Freight	
T5121E00	Freight air transport services (incl. forwarding) in Estonia / to Estonia	Freight transport by air (excl. supporting and auxiliary air transport services). Sale of service – a sum that a non-resident client pays to your economic unit for freight transport by air.
T5121V00	Freight air transport services (incl. forwarding) abroad / to abroad	Purchase of service – a sum that your economic unit pays to a non-resident economic unit for freight transport by air. Including:
T5121YRV	Rental of air transport vehicle with crew for goods freight	* cabotage by air * container transport by aircraft * transport of post and packages by air on behalf of post and courier companies * renting/leasing aircraft with crew
		Excluding: * renting/leasing movable containers (<i>reported under SJ "Other business services", item SJ33 - Operating leasing services</i>) * renting/leasing immovable containers for storage of goods (<i>reported under SC "Transport", item SC23 - Air Transport - Other</i>) * post and package transport by post and courier companies (<i>reported under SC "Transport", item SC4 - Post and courier services</i>) * renting/leasing of aircraft without crew for freight transport (<i>reported under SJ "Other business services", item SJ33 - Operating leasing services</i>) * financial leasing of aircraft (<i>not reported in the questionnaire</i>) * <i>purchase and sale of fuel and supplies (not reported in the questionnaire)</i>
		More detailed explanations and examples can be found in chapter 4.3 Reporting transport services in the questionnaire .
SC23	Air transport - Other	
T5223000	Services incidental to air transport (incl. storage services of transport companies)	Supporting and auxiliary transport services that are not directly connected to passenger or freight transport by air. Sale of service – a sum that a non-resident client pays to your economic unit for services to support freight transport by air.
		Purchase of service – a sum that your economic unit pays to a non-resident economic unit for services to support freight transport by air. Including: * cargo handling * storage and warehousing renting/leasing storage facilities (also immovable containers and tanks for storage of goods) * packaging/repackaging goods by transport company * hangar and towing services * navigational aid * operational services in airports * charges for landing rights and airport fees * catering for aviation * cleaning of aircraft * salvage and rescue operations * agents' fees associated with passenger and freight transport by air (e.g., freight forwarding and brokerage services)
		Excluding: * repair of airport facilities (<i>reported under SE "Construction", item SE1 or SE2</i>) * maintenance and repair of aircraft (<i>reported under SB "Maintenance and repair services"</i>) * <i>purchase and sale of fuel and supplies (not reported in the questionnaire)</i>
		More detailed explanations and examples can be found in chapter 4.3 Reporting transport services in the questionnaire .

Code of service	Name of service	Description of service
SC3	Other modes of Transport	
SC3A	Space transport	
T5122000	Space transport services	<p>Sale of service – a sum that a non-resident client pays to your economic unit for transport of passengers or freight by spaceship.</p> <p>Purchase of service – a sum that your economic unit pays to a non-resident economic unit for transport of passengers or freight by spaceship.</p> <p>Including:</p> <ul style="list-style-type: none"> * launching satellites <p>Excluding:</p> <ul style="list-style-type: none"> * maintenance and repair of satellites (<i>reported under SB "Maintenance and repair services"</i>)
SC3B	Rail transport	
SC3B1	Rail transport - Passenger	
T491MR00	International passenger rail transport services by a non-resident carrier	<p>Transport of passengers by rail</p> <p>Sale of service – a sum that is paid to your economic unit for the transport of non-resident passengers (the cost of tickets of non-resident passengers) or for passenger transport purchased from non-resident carriers and passenger transport included in travel packages.</p>
T491R000	International passenger rail transport services by a resident carrier	<p>Purchase of service – a sum that your economic unit pays to a non-resident carrier for passenger transport by rail.</p>
T491YR00	Rental of rail transport vehicle with crew for passengers transport	<p>Including:</p> <ul style="list-style-type: none"> * goods sold on board for consumption during rail transport, i.e. serving passengers on international lines – income from serving non-resident passengers, incl. the expenditures of non-resident passengers on board of the vessel, e.g. in a restaurant, bar, store, etc. (may be estimated)
T49311MR	Domestic passenger rail transport services by a non-resident carrier	<ul style="list-style-type: none"> * transport included in holiday and tour packages

T9999995	Investment grants	Investment subsidies made abroad or the use of investment subsidies received from abroad (for example, foreign aid for the acquisition of fixed assets, construction of transmission lines and routes, etc.).

3.3 CODE OF NON-RESIDENT'S COUNTRY

Non-resident's country is the country in which the economic unit is registered and has a permanent place of business. It is the country of the resident to whom the service is sold or from whom it is purchased.

A two-digit code in accordance with the Nomenclature of Countries and Territories for the External Trade Statistics of the Community and Statistics of Trade between Member States (GEONOM) is entered in this cell. Services and other transactions provided by or received from five international organisations should also be reported in the questionnaire. These organisations are:

- International Monetary Fund (IMF)
- European Investment Bank (EIB)
- European Commission
- European Bank for Reconstruction and Development (EBRD)
- Nordic Investment Bank (NIB)

The list is provided in [Annex 2. Nomenclature of Countries and Territories for the External Trade Statistics of the Community and Statistics of Trade between Member States \(GEONOM\)](#).

Note: Estonia cannot be a non-resident's country.

Even if an Estonian economic unit (resident) has registered for VAT in a foreign country, the economic unit cannot be considered a foreign-registered economic unit: it is the provision of services abroad by an Estonian economic unit. All sales and purchases of services by Estonian economic entities should be included in the foreign trade in services questionnaire.

An economic unit registered in a foreign country (non-resident) that has registered for VAT in Estonia cannot be considered a resident of Estonia: it is a non-resident and all transactions with that economic unit are recorded in foreign trade in services.

Note: Intra-EU transactions should be broken down by Member State.

3.4 TOTAL COST OF SERVICE

In the foreign trade in services questionnaire, each service invoice does not have to be shown separately. If several transactions took place with residents of a specific country in the reference period (quarter), the total amount of purchases and sales of the service can be reported here. Aggregation is allowed if indicators such as transaction in service, service and other transaction code and non-resident's country code are the same on different invoices.

The cost of the service is the value of the service, net of taxes (e.g. VAT, etc.). The amount is expressed in euros and preferably in full euros. If the transaction took place in another currency, the amount is recorded here in euros on the basis of the entries in the accounts.

3.5 THE MAIN MODE OF SUPPLY

The mode of supply, i.e. the way in which the service is provided, is determined according to the locations of the service provider and customer. In the case of sale and purchase transactions in services, the focus is on transactions between residents and non-residents regardless of the location or delivery method, whereas the mode of supply of the service describes the location of transaction partners and the mode of delivery. There are four main modes of supply, but this questionnaire examines the following three:

Mode 1 – cross-border trade where both the service provider (supplier) and the consumer remain on the territory of their own country (this mode of supply corresponds to the traditional concept of trade, i.e. the service moves between partners and the partners do not meet to transfer the service).

Mode 2 – consumption abroad where the customer (consumer) consumes the service outside the territory of his or her country (e.g. tourists who consume travel services).

Mode 4 – presence of natural persons where natural persons (either employees of economic entities providing the service or self-employed persons) are abroad (incl. in international waters) for providing the service (e.g. if a software developer travels to the customer (service buyer) to supervise a software development project).

Figure 1. Modes of supply

The same service can be provided in several ways.

Example 1:

An Estonian law firm offers legal services:

- Advice to a non-resident client is given via electronic means of communication (internet, Skype, etc.) – mode 1
- A non-resident client's representative comes to the law firm from abroad to obtain advice – mode 2
- An employee of the law firm goes abroad to provide advice to a non-resident – mode 4

Example 2:

For many countries, tourism and travel-related services are very important types of service which are mostly associated with mode 2, where the service is used abroad. However, tourism services can also be provided in other ways:

- A branch manager is an employee of the parent company (intra-corporate movement of employees abroad) – mode 4.
- Sale of the services of international tourism operators via computerised reservation systems – mode 1.
- The presence of foreign guides and group leaders in the tourist destination and the provision of their services to tourists (contractual services) – mode 4.

MODE OF SUPPLY	
Explanation	
SALE OF SERVICE (EXPORTS)	PURCHASE OF SERVICE (IMPORTS)
1. Cross-border trade	
A resident (R) provides services to a non-resident (NR) via the internet and by mail (the partners do not meet).	
R sells services to NR via the internet.	R buys services from NR via internet.
* An Estonian economic unit builds a website for a Norwegian economic unit and the service is delivered via the internet without meeting each other.	* An Estonian economic unit buys a Microsoft Office license via the internet.
2. Consumption abroad	
NR comes to R to use a service.	
NR comes to R to use a service.	R goes to NR to use a service.
* An Estonian economic unit provides sewing services to a Swedish economic unit (the Swedish economic unit delivers fabrics and other sewing materials to Estonia, the sewing service is provided in Estonia, and the finished products are exported to Sweden or to another foreign country to the address given by the Swedish economic unit).	* An Estonian construction company builds a house for a Finnish client in Finland and purchases piping service for the construction of the house from a local economic unit in Finland.
4. Presence of natural persons	
R goes to NR to provide a service to NR.	
R goes to NR to provide a service.	NR comes to R to provide a service.
* An Estonian construction company goes to Finland to build a house on the basis of an order from a Finnish economic unit.	* A representative of a German economic unit comes to Estonian economic unit to perform equipment maintenance.

Cross-border trade (mode 1) takes place when a service is supplied “from the territory of one country into the territory of any other country”. This means that the service is provided by a resident of one country to a resident in another country and only the service “crosses the border”. This is similar to trade in goods where the product is delivered across borders and the consumer and the supplier remain in their respective territories.

Such provision of services is possible via various means of communication, such as telephone, fax, internet, courier or postal service. For example:

- a law firm provides legal advice to a non-resident client by telephone;
- a doctor consults a patient by e-mail;
- an auditor gives business advice by mail; for example, on setting up a business in his/her country.

For the most part, **transport services** (except ancillary services provided to resident carriers in foreign ports or non-resident carriers in resident ports), **telecommunication-, information- insurance and pension-, financial services** and **charges for the use of intellectual property** are provided by this mode.

Wholesalers and retailers provide services to their customers by keeping goods in suitable storage places and giving customers the opportunity to purchase goods easily and quickly. A margin is applied to their fee, which is the difference between the purchase price and selling price of the goods. As a rule, transactions related to wholesale and retail trade can be considered cross-border service provision.

The services referred to above are not provided by this mode of supply in the following cases:

- the service is provided with physical presence abroad (mode 4);
- transactions showing characteristics of mode 2.

Computer services, other business services, employment services and **cultural and recreational services** are usually as a combination of modes 1 and 4. In the case of these services, it is important to know exactly where the service was delivered in order to determine the correct mode of supply.

Consumption abroad (mode 2) takes place when the service is supplied “in the territory of one country to the service consumer of any other country”. This means that the service buyer consumes the service outside his/her home country: the service buyer or his/her property is legally located abroad. Typical examples are:

- tourism services, visits to museums and theatres;
- travel abroad for medical services;
- taking language courses abroad.

For example, ship repairs abroad, where only the property of the buyer moves or is located abroad, are covered by this mode of supply.

As a rule, **travel services** are supplied by mode 2. In the case of **support services for transport**, where services are provided to resident carriers in non-residents' ports or by non-resident carriers in residents' ports, the mode of supply is usually 2. This mode of supply also applies to **maintenance and repair services** and **manufacturing services on physical inputs owned by others**. In the case of maintenance and repair services, exceptions include cases where an employee travels abroad for the purpose of providing a service – this is considered mode 4.

Modes 2 and 4 cover services related to **waste treatment and de-pollution**.

Presence of natural persons (mode 4) takes place when the service provider (or his/her representative) temporarily goes abroad to provide the service there; i.e. a service provider of one country provides a service abroad through its employees or representatives who reside there.

If the supplier is located in country A and the customer in country B, contracted services may be provided in a foreign country (country B) by mode 4 as follows:

- **Employees of the economic unit** – an employee of economic unit A is sent to country B to provide a service. A contract for the provision of the service is concluded between the employee's employer and the economic entities of country B.

Example 3: *An Estonian IT enterprise sends an employee to Finland to provide IT services to a Finnish economic unit.*

- **Self-employed persons** – a self-employed person from country A goes to country B to provide a service to an economic unit of country B. The service contract is concluded between the self-employed person and the economic unit of country B.

Example 4: *An Estonian self-employed lawyer goes to Finland to provide legal consultation (legal service).*

- **Intra-corporate transfers and foreign employees employed directly by foreign-registered/established enterprises** – an economic unit of country A owns a branch/subsidiary in country B and sends an employee there to provide a service, or the subsidiary hires foreign labour itself.

Example 5: *A surgeon working in an Estonian hospital is sent to a branch in Finland to provide services temporarily.*

- **Service providers who wish to conclude contracts for the provision of services and natural persons authorised to conclude contracts** – these persons go to country B for negotiations to provide a service to the economic unit of country B or to establish a branch/subsidiary in country B. In economic terms, this is not trade and, at least initially, there are no purchase or sale transactions. However, the movement of employees is covered by mode 4. Negotiations are expected to lead to transactions, and future purchases and sales may fall under different modes of supply.

Under mode 4, service providers with different qualifications and skills can provide services. The purpose of the presence abroad can only be to provide a service. Some examples:

- *An employee of a computer enterprise or a self-employed computer consultant goes abroad to provide a contractual computer services.*
- *A programmer is temporarily transferred to a foreign subsidiary to carry out programming (in-house provision of services).*
- *A plumber goes to work on a construction site in a foreign country through a placement agency.*
- *A fruit picker who goes to work temporarily on a farm abroad (consumer of the employment agency's service) through an employment agency (the fruit picker's employer).*

[Annex 1. NACE economic activities, service codes and modes of supply](#) lists the main modes of supply for each service.

3.6 SHARE OF THE MAIN MODE OF SUPPLY

As the same service is often provided according to a combined mode of supply (the provision of services has characteristics of several modes of supply) or the same service is provided according to different modes of supply (see [3.5 The main mode of supply](#)), the proportion of the mode of supply selected in the questionnaire should be noted here as a percentage.

Example 1:

An Estonian IT enterprise provided computer services to Latvian enterprises for a total of 1,000 euros in a quarter, of which 600 euros worth of services were provided online, and for 400 euros, computers were installed in Latvia. In this case, the fields should be filled in as follows:

Total cost of service in euros	1,000
Mode of supply	1 (cross-border service)
Share of the main mode of supply	60

As this is an optional field, leaving it empty means that the mode of supply selected in the previous row is automatically considered the only mode of supply, i.e. all these services were provided by the mode selected in the previous row.

3.7 REMARK

If you want to specify the above data, you can add explanations here in free format.

4. EXAMPLES OF REPORTING SERVICE TRANSACTIONS

Abbreviations of Estonian economic units used in the following chapters:

- EE – Estonian economic unit (excluding construction, travel and transport enterprises)
- EH – Estonian construction enterprise (the main activity according to NACE is construction)
- ER – Estonian travel enterprise (tour operator or travel agency) (the main activity according to EMTAK is the provision of travel services)
- ET – Estonian transport enterprise (the main activity according to NACE is the provision of transport services)

4.1 REPORTING TRAVEL SERVICES IN THE QUESTIONNAIRE

Travel services are consumed during a trip abroad, offered to non-residents in Estonia or purchased from non-residents. They include services related to holiday or travel packages, travel reservation or arranging or booking accommodation, domestic or foreign travel tickets for travel by air, rail, ship, bus or other means of transport (or rental of local transport) and hotel or other accommodation, catering, spa and health services, guide and interpreting services, tour escort services, conference services, etc.

Travel enterprises are defined as economic units whose NACE starts with 55, 79 or is 86905. Travel enterprises must reflect the cost of the full service in the questionnaire.

The main travel services and their codes are:

Code of service and other transaction	Description of service
T491MR00	International passenger rail transport services by a non-resident carrier
T491R000	International passenger rail transport services by a resident carrier
T491YRV0	Rental of rail transport vehicle with crew for passengers transport
T49311MR	Domestic passenger rail transport services by a non-resident carrier
T49311R0	Domestic passenger rail transport services by a resident carrier
T49312MR	Domestic passenger land transport services by a non-resident carrier
T49312R0	Domestic passenger land transport services by a resident carrier
T4939MR0	International passenger land transport services by a non-resident carrier
T4939R00	International passenger land transport services by a resident carrier
T49YRV00	Rental of road transport vehicle with crew for passengers transport
T501MR00	Sea and coastal passenger water transport services by a non-resident carrier
T501R000	Sea and coastal passenger water transport services by a resident carrier
T501YRV0	Rental of sea transport vehicle with crew for passengers transport
T503MR00	Inland passenger water transport services by a non-resident carrier
T503R000	Inland passenger water transport services by a resident carrier
T511MR00	Passenger air transport services by a non-resident carrier
T511R000	Passenger air transport services by a resident carrier
T511YRV0	Rental of air transport vehicle with crew for passengers transport
T55MR000	Accommodation services provided by a non-resident host
T55R0000	Accommodation services provided by a resident host
T5600000	Food and beverage serving services
T7900000	Travel agency, tour operator and other reservation services and related services

In addition, travel enterprises may sell or purchase services not mentioned above at the request of customers, and these should be reported according to the classification of services (see [Annex 1. NACE economic activities, service codes and modes of supply](#) or [3.2. CODE OF SERVICE AND OTHER TRANSACTION](#)).

Travel services are often bought and sold through online portals such as booking.com; Airbnb.com, etc. In this case, the code of country actually providing the service should be used as the code of non-resident's country.

Example 1:

Accommodation was purchased in Stockholm through booking.com website. In this case, the invoice is issued by booking.com, an online travel agency. When reporting the purchase or sale of this accommodation service, "Code of non-resident's country" should be SE, i.e. Sweden, as the accommodation service is provided by a Swedish tourist accommodation establishment.

The same should be done with the purchase of airline tickets.

Example 2:

Through bookinghouse.ee, airline tickets were purchased for a Tallinn-Dresden trip on a German airline. The invoice is issued by bookinghouse.ee, which sold the tickets. As the flight is on a German airline, DE, i.e. Germany, should be indicated in the questionnaire field "Code of non-resident's country".

In addition to the data provided by travel enterprises, travel services are compiled based on an econometric model, the main inputs of which are the foreign travel statistics (the number of foreigners who visited Estonia and the number of resident tourists abroad; both by country and the duration of the trip) produced on the basis of the mobile positioning data of data analytics enterprise Positium and surveys on tourist spending in Estonia and abroad conducted by Statistics Estonia. These data are supplemented on the basis of information from additional data sources, e.g. survey of economic units, statistics on transactions with bank cards, border crossing and accommodation statistics, etc.

4.1.1 SALE/PURCHASE OF TRAVEL PACKAGES FROM TRAVEL ENTERPRISES

Travel packages can be purchased from travel enterprises (tour operator/travel agency) by both legal persons and private persons. In both cases, travel enterprises must show these transactions in the questionnaire.

If separate costs of all services included in the package are not known, the transactions must be reported with the package cost under the code T7900000 "Travel agency, tour operator and other reservation services and related services".

Example 1:

A Latvian enterprise (LV1) buys 10 package tours to Egypt from an Estonian travel enterprise (ER1), paying 6,000 euros. The Estonian travel enterprise (ER1) bought these package tours from an Egyptian travel enterprise (EG1) for 5,000 euros.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of travel service	Cost (euros)	Residency of partner of Estonian travel enterprise	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	ER1 sells Egypt trips to LV1	6,000	LV	M	T7900000	Travel agency, tour operator and other reservation services and related services	LV	6,000	1
2	ER1 buys Egypt trips from EG1	5,000	EG	O	T7900000	Travel agency, tour operator and other reservation services and related services	EG	5,000	1

ER1 must show in this questionnaire both the sale of package tours to LV1 and their purchase from EG1, as both are non-residents in relation to ER1. As the prices of the services included in package tours are not known, the total cost of the service is shown in the case of both purchases and sales.

In this case, mode 1 can be considered as the main mode of supply, provided that the purchase/sale procedures of the service were carried out via the internet and the buyer and seller did not meet.

Example 2:

A Latvian enterprise (LV1) buys 10 package tours to Egypt from an Estonian enterprise (EE1, which is not a travel enterprise), paying 6,000 euros. The Estonian enterprise (EE1) bought these package tours from an Estonian travel enterprise (ER1) for 5,000 euros.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of travel service	Cost (euros)	Residency of partner of Estonian enterprise (EE1)	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	EE1 sells Egypt travel packages to LV1	6,000	LV	M	T7900000	Travel agency, tour operator and other reservation services and related services	LV	6,000	1
2	EE1 buys travel packages from ER1	5,000	EE	Not reported: transaction between residents					

EE1 must show the sale of package tours to LV1 in the questionnaire. Package tours were purchased by EE1 from a resident, i.e. ER1, so EE1 does not report this transaction in the questionnaire.

ER1 must report the purchases of services related to the transaction if they were acquired from non-residents: airline tickets, accommodation, etc. The sale to EE1 does not need to be reported by ER1, as it is a transaction between residents.

The main mode of supply of the service in this case would be mode 1, provided that the purchase/sale procedures of the service were carried out via the internet and the buyer and seller did not meet.

4.1.2 SALE/PURCHASE OF TRAVEL SERVICES FROM TRAVEL ENTERPRISES

Travel enterprises must report in the questionnaire all purchased or sold services with the service codes (see [Annex 1. NACE economic activities, service codes and modes of supply](#)) in as much detail as possible. Here are some examples.

Example 1:

A Latvian enterprise (LV1) wishes to send its employees to Estonia on business. For accommodation and airline tickets, the enterprise contacts an Estonian travel enterprise (ER1), which organises the purchase of accommodation and airline tickets.

1. The Estonian travel enterprise (ER1) pays an Estonian hotel chain (EE1) 1,500 euros for accommodation.
2. The Estonian travel enterprise (ER1) pays a Latvian airline (LV2) 1,000 euros for flights.
3. The service fee of the Estonian travel enterprise (ER1) for booking the airline tickets and accommodation is 100 euros.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of travel service	Cost (euros)	Residency of partner of Estonian enterprise	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	ER1 buys accommodation for LV1 from EE1	1,500	EE	Not reported: transaction between residents					
	ER1 sells accommodation to LV	1,500	LV	M	T55R0000	Accommodation services provided by a resident host	LV	1,500	2
2	ER1 buys airline tickets from LV2	1,000	LV	O	T511MR00	Passenger air transport services by a non-resident carrier	LV	1,000	1
	ER1 sells airline tickets bought from LV2 to LV1	1,000	LV	M	T511MR00	Passenger air transport services by a non-resident carrier	LV	1,000	1
3	LV1 pays ER1 commission (service fee)	100	LV	M	T7900000	Travel agency, tour operator and other reservation services and related services	LV	100	1

From the point of view of ER1, the purchase of accommodation is a transaction with a resident, i.e. both economic units are residents in Estonia, and therefore, this transaction is not included in the questionnaire.

The provision of accommodation service is mode 2, as the service is consumed outside the home country. As a rule, airline tickets and commission are mode 1, i.e. cross-border trade.

Example 2:

An Estonian tourism enterprise (ER1) sells a Baltic cruise via the internet to a Swedish enterprise (SE1) and is paid 1,800 euros, incl. the service fee. ER1 purchases the following services for SE1 for the cruise:

1. Ferry tickets from an Estonian enterprise (EE1) for 200 euros
2. Bus tickets Tallinn-Pärnu and Pärnu-Riga from an Estonian enterprise (EE2) for 100 euros
3. Accommodation with breakfast in Pärnu from an Estonian enterprise (EE3) for 300 euros
4. Accommodation in Riga from a Latvian company (LV1) for 500 euros
5. Public transport services for 50 euros are used in Tallinn, Pärnu and Riga
6. Airline tickets for the Riga-Stockholm route from a Latvian company (LV2) for 400 euros

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of travel service	Cost (euros)	Residency of partner of Estonian enterprise	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	ER1 buys Stockholm-Tallinn ferry tickets from EE1	200	EE	O		<i>Purchase not reported: transaction between residents Sale reported: transaction between resident and non-resident</i>			
	ER1 sells ferry tickets to SE1	200	SE	M	T501R000	Sea and coastal passenger water transport services by a resident carrier	SE	200	1
2	ER1 buys Tallinn-Pärnu and Pärnu-Riia bus tickets from EE2	100	EE	O		<i>Purchase not reported: transaction between residents Sale reported: transaction between resident and non-resident</i>			
	ER1 sells bus tickets to SE1	100	SE	M	T4939R00	International passenger land transport services by a resident carrier	SE	100	1
3	ER1 buys accommodation in Pärnu from EE3	300	EE	O		<i>Purchase not reported: transaction between residents Sale reported: transaction between resident and non-resident</i>			
	ER1 sells accommodation in Pärnu to SE1	300	SE	M	T55R0000	Accommodation services provided by a resident host	SE	300	2
4	ER1 buys accommodation in Riga from LV1	500	LV	O	T55MR000	Accommodation services provided by a non-resident host	LV	500	2
	ER1 sells accommodation in Riga to SE1	500	SE	M	T55MR000	Accommodation services provided by a non-resident host	SE	500	
5	ER1 buys public transport services in Pärnu and Tallinn	25	EE	O		<i>Purchase of public transport services in Estonia is a transaction between a resident and an Estonian transport enterprise.</i>			
	ER1 buys public transport services in Riga	25	LV	O	T49312MR	Domestic passenger land transport services by a non-resident carrier	LV	25	1
	ER1 sells public transport services in Estonia to SE1	25	SE	M	T49312R0	Domestic passenger rail transport services by a resident carrier	SE	25	1
	ER1 sells public transport services in Latvia to SE1	25	SE	M	T49312MR	Domestic passenger land transport services by a non-resident carrier	SE	25	1
6	ER1 buys Riga-Stockholm airline tickets from LV2	400	LV	O	T511MR00	Passenger air transport services by a non-resident carrier	LV	400	1
	ER1 sells airline tickets to SE1	400	SE	M	T511MR00	Passenger air transport services by a non-resident carrier	SE	400	1
7	ER1 service fee (1,800 euros less expenses)	250	EE	M	T7900000	Travel agency, tour operator and other reservation services and related services	SE	250	1

ER1 does not report purchase of services from residents: purchase of ferry tickets from an Estonian enterprise (EE1), purchase of bus tickets from an Estonian enterprise (EE2), purchase of accommodation from an Estonian enterprise (EE3) and purchase of public transport services in Estonia.

The cost of public transport services in Estonia and Latvia is given as a single sum in the example. If the exact amount per country is not known, the service can be divided proportionally (for example, 60% in Estonia and 40% in Latvia), or if the proportion is not known, the sum can be divided into half, as in the previous example.

Example 3:

An Estonian travel enterprise (ER1) buys the following services from a Latvian enterprise (LV1):

1. Accommodation for 3,000 euros
2. Airline tickets for 1,000 euros
3. Guide service for 200 euros
4. Catering service for 300 euros
5. Spa services for 400 euros
6. Local transport services in Latvia for 100 euros
7. Conference services for 800 euros

These services are consumed in Latvia.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of travel service	Cost (euros)	Residency of partner of Estonian enterprise	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	ER1 buys accommodation from LV1	3,000	LV	0	T55MR000	Accommodation services provided by a non-resident host	LV	3,000	2
2	ER1 buys airline tickets from LV1	1,000	LV	0	T511MR00	Passenger air transport services by a non-resident carrier	LV	1,000	1
3	ER1 buys catering services from LV1	300	LV	0	T5600000	Food and beverage serving services	LV	300	2
4	ER1 buys guide services from LV1	200	LV	0	T7900000	Travel agency, tour operator and other reservation services and related services	LV	600	2
5	ER1 buys spa services from LV1	400	LV	<i>Reported with guide services: T7900000</i>					
6	ER1 buys local transport service from LV1	100	LV	0	T49312MR	Domestic passenger land transport services by a non-resident carrier	LV	100	1
7	ER1 buys conference service from LV1	800	LV	0	T8230000	Convention and trade show organisation services	LV	800	2

In this example, it is known that the services are consumed in Latvia, but in the case of foreign trade in services, it is not important where the consumption of services takes place. The determining factor is who the transaction partners are. In this case, the purchase and sale of services take place between a resident and a non-resident, so all transactions must be included in the foreign trade in services questionnaire.

The mode of supply for passenger transport is mode 1, i.e. cross-border trade. For the consumption of all other services, it is necessary to go abroad, and therefore, their mode is 2.

4.1.3 REPORTING TRAVEL EXPENSES RELATED TO BUSINESS TRIPS OF ESTONIAN ECONOMIC ENTITIES

Services related to business trips may be ordered and paid:

- Via online portals and websites where travel enterprises and non-travel economic units can buy services. When purchasing services via internet intermediaries, the residency of the intermediary is unknown, and therefore, the purchase and sale of these services should be reported according to the actual provider of the service (see [4.1. REPORTING TRAVEL SERVICES IN THE QUESTIONNAIRE](#)).
- Via a travel agency, which finds the necessary services for the economic units.

The ordering of travel tickets, accommodation and other services via the internet has become very easy, which is why many **non-travel enterprises (EE1) buy services related to business trips themselves**.

For the foreign trade in services questionnaire, the costs of a non-travel enterprise can be divided into two categories:

- **Travel costs**, flight ticket or ferry ticket, etc. to and from the destination (international passenger transport). An appropriate passenger transport code must be found according to the type of transport (land, air, rail or sea). If the passenger transport service was purchased from non-residents, these costs must be included in the questionnaire.
- **Other travel expenses**, including accommodation, transport on site, internet in hotels, city taxes, luggage storage, etc. These expenses are not included in the questionnaire by non-travel enterprises. The data are obtained by means of an econometric model.

Example 1:

An Estonian enterprise (EE1) sends an employee on a business trip, where he/she visits **a trade fair and a reseller in Paris** and visits **resellers in Brussels and Antwerp** with a Belgian agent. The business trips lasts 9 days. Travel expenses and their inclusion in the questionnaire:

TRAVEL EXPENSES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of travel expenses	Cost (euros)	Method of purchase	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	Tallinn-Paris airline ticket from an Estonian airline	200	via the internet	<i>Not reported: transaction between residents</i>					
2	Accommodation with breakfast in Paris for 5 nights	350	via the internet	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
3	Subway ticket for 10 trips	50	in Paris	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
4	Luggage storage at the trade fair (3 days: 3 x 7.50 euros)	22.5	at the exhibition centre	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
5	Fair ticket in Paris	180	via the internet	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
6	Dinner with a customer in Paris	120	in Paris	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
7	Taxi ride in Paris	35	in Paris	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
8	Internet at the exhibition centre in Paris	20	in Paris	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
9	Paris-Brussels train ticket from a French railway enterprise	80	in Paris	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
10	Accommodation with breakfast in Brussels	60	via the internet	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
11	Car rental in Brussels for 2 days	160	in Brussels	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
12	Accommodation in Antwerp for 2 nights	140	via the internet	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
13	City tax in Antwerp	5	in Antwerp	<i>EE1 does not report in the questionnaire. Business and private travel costs are calculated using an econometric model.</i>					
14	Brussels-Riga-Tallinn airline ticket from a Latvian airline	280	via the internet	0	T511MR00	Passenger air transport services by a non-resident carrier	LV	280	1
15	Daily allowance for 9 days x 50 euros	450	bank transfer in Tallinn	<i>Not reported, as it is not a service.</i>					

Of the airline tickets to and from the destination, only the cost of the ticket purchased from the Latvian airline should be reported, as the purchase of an airline ticket from an Estonian airline is a transaction between residents and is therefore not reported as foreign trade in services. The airline ticket for the trip back could have been bought on an Estonian or a foreign website, but as it is not easy to identify the residency of the owner of

this domain, the purchase should be reported taking into account that the flight was operated by a Latvian airline, i.e. by a non-resident.

Non-travel enterprises do not have to report other services in the questionnaire, as private and business travel costs are calculated using an econometric model.

If a non-travel enterprise **EE1 orders some services from an Estonian travel enterprise (ER2)** and some services are acquired through travel expenses, the purchase of travel services must be reported by both EE1 (services related to international passenger transport) and ER2 (all services purchased from non-residents according to the order of EE1).

Example 2:

An Estonian enterprise (EE1) sends an employee on a business trip, where he/she visits **a trade fair and a reseller in Paris** and visits **resellers in Brussels and Antwerp** with a Belgian agent. The business trips lasts 9 days. For travel tickets, accommodation and car rentals, EE1 contacts an Estonian travel enterprise (ER2), which organises the purchase of these services. In Belgium, ER2 uses the services of the Belgian agent to purchase services. Travel expenses include:

No	Description of travel expenses	Cost (euros)	Method of purchase
1	Tallinn-Paris airline ticket from an Estonian airline	200	ER2 bought via the internet
2	Accommodation with breakfast in Paris, 5 nights	350	ER2 bought via the internet
3	Subway ticket for 10 trips	50	in Paris
4	Luggage storage at the trade fair (3 days: 3 × 7.50 euros)	22.5	at the exhibition centre
5	Fair ticket in Paris	180	via the internet
6	Dinner with a customer in Paris	120	in Paris
7	Taxi ride in Paris	35	in Paris
8	Internet at the exhibition centre in Paris	20	in Paris
9	Paris-Brussels train ticket from a French railway enterprise	80	ER2 bought via the internet
10	Accommodation with breakfast in Brussels	60	ER2 (BE agent)
11	Car rental in Brussels for 2 days	160	ER2 (BE agent)
12	Accommodation in Antwerp for 2 nights	140	ER2 (BE agent)
13	City tax in Antwerp	5	ER2 (BE agent)
14	Brussels-Riga-Tallinn airline ticket from a Latvian airline	280	ER2 bought via internet
15	Daily allowance for 9 days × 50 euros	450	EE1 bank
16	Commission to Estonian travel enterprise (incl. Belgian agent fee 30 euros, paid by ER2 from commission received from EE1)	100	ER2

As EE1 purchased the travel tickets from an Estonian travel enterprise (ER2), in this case, **EE1 does not need to report the transactions related to the business trip in the questionnaire**. The transaction between EE1 and the travel enterprise is a transaction between residents.

The Estonian travel enterprise (ER2) must report these transactions as follows:

QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE						No from travel expenses
Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply	
0	T55MR000	Accommodation services provided by a non-resident host	FR	350	2	2
0	T491MR00	International passenger rail transport services by a non-resident carrier	FR	80	1	9
0	T55MR000	Accommodation services provided by a non-resident host	BE	205	2	10, 12, 13
0	T7900000	Travel agency, tour operator and other reservation services and related services	BE	190	2	11, 16
0	T511MR00	Passenger air transport services by a non-resident carrier	LV	280	1	14

The travel enterprise ER2 must report separate accommodation and passenger transport services according to the mode of transport. ER2 reports other travel related services under "Travel agency, tour operator and other

reservation services and related services” (T7900000), including the 30-euro fee paid to the Belgian agent. In most cases, city tax is paid with accommodation, and in this case, the city tax can be reported under the accommodation service, as accommodation services cannot be purchased without paying the city tax. If the city tax is paid separately to a non-resident supplier, it should also be included under code T7900000.

4.2 REPORTING CONSTRUCTION SERVICES IN THE QUESTIONNAIRE

Construction comprises the cost of construction by residents in connection with construction projects in a foreign country, and the cost of construction by non-residents in connection with construction projects in Estonia. This is where respondents should also report any goods and services acquired for construction in the country where the construction project is located. International construction contracts are generally short-term. In case of large long-term construction projects abroad, a direct investment enterprise is usually established in the target country, and these construction projects are considered as projects of that country.

Construction services mean services provided by an economic unit engaged in construction, excluding the cost of materials required for construction (for more information, see [3.2. CODE OF SERVICE AND OTHER TRANSACTION](#)).

The main codes used for construction services are:

Code of service and other transaction	Description of service
T41ET000	Building construction works in Estonia
T41VT000	Building construction works abroad
T42ET000	Civil engineering works in Estonia
T42VT000	Civil engineering works abroad
T43ET000	Special construction works in Estonia
T43VT000	Special construction works abroad
T44EKE00	Goods purchased in Estonia for a construction project in Estonia
T44EKV00	Goods purchased in Estonia for a construction project abroad
T44VKE00	Goods purchased abroad for a construction project in Estonia
T44VKV00	Goods purchased abroad for a construction project abroad

A construction service can be provided by the following modes of supply:

- Mode 2, i.e. consumption abroad – whereby the customer goes to the supplier to use the service.

Example 1:

A Finnish construction enterprise subcontracts an Estonian construction enterprise to install the floors in a house built in Estonia. The Estonian construction enterprise provides the floor installation service in Estonia to a non-resident customer.

- Mode 4, i.e. presence of natural persons – whereby the supplier goes to the customer to provide the service.

Example 2:

An Estonian construction enterprise goes to Finland to construct a building at the request of a Finnish enterprise.

In case of goods purchased for the provision of construction services, the mode of supply should correspond to the mode of supply of the specific service for which the goods were acquired.

4.2.1 CONSTRUCTION ABROAD

The execution of building construction, civil engineering and special construction works abroad **must be reported** by:

- **Estonian construction enterprises** that supply construction services **abroad to non-resident customers**. In this case, the country code for the country where the construction is carried out must be specified in the field “Code of non-resident’s country” (even if the services are paid for by a resident of another country). The total cost of service is the cost of construction services excluding the cost of building materials.
- **Estonian construction enterprises** that supply construction services **abroad to resident customers**. In this case, the resident owns land abroad and wants to build on it. Since the land and buildings can only

be owned by a resident of the country where the land and buildings are located, it means a non-resident for reporting purposes. The country code for the country where the construction is carried out must be specified in the field "Code of non-resident's country" (even if the services are paid for by a resident of another country). The total cost of service is the cost of construction services excluding the cost of building materials.

The execution of building construction, civil engineering and special construction works abroad **is not reported** by **Estonian non-construction enterprises** that order a non-resident supplier to execute building construction, civil engineering or special construction works abroad. For an Estonian non-construction enterprise, this represents an investment in a foreign country and these transactions are reported in the balance of payments report of Eesti Pank, under section 1.14. "Real estate abroad".

In addition to construction services, **construction enterprises** are required to report the following in the questionnaire:

- The cost of goods purchased in Estonia for a construction project abroad, i.e. the sale of goods purchased in Estonia to the customer. This transaction should be reported if the cost of goods can be distinguished from the cost of services. The data should refer to the quarter when the non-resident was invoiced for the goods purchased in Estonia. Although the goods were purchased in Estonia, the code of the country where the construction takes place must be specified in the field "Code of non-resident's country" in the row for this entry.
- The cost of goods purchased abroad for a construction project abroad. When construction services are provided abroad, the respondent must report the goods purchased in the country where the construction takes place as well as goods purchased in other (i.e. third) countries. In the case of goods purchased in third countries, the country where the goods were purchased must be specified in the field "Code of non-resident's country". If the respondent is reporting the sale of goods purchased in third countries, the country where the construction takes place must be specified in the field "Code of non-resident's country".
- If non-residents are subcontracted to provide services for a construction project abroad, these services should be reported as the purchase of construction services abroad. When reporting the purchase of services from a third country, the country where the services were purchased from should be specified in the field "Code of non-resident's country", and when reporting sales, the country where the construction takes place.

Example 1:

An Estonian construction enterprise (EH3) sells construction services to a Finnish enterprise (FI1) that wants a building to be constructed in Finland:

1. EH3 brings construction goods from Estonia for 10,000 euros.
2. EH3 purchases goods in Finland for 18,000 euros, but submits a 20,000 euro invoice, incl. commission, to customer FI1 for goods purchased in Finland.
3. EH3 also purchases for the building ventilation equipment from Germany (DE1) for 7,000 euros; the equipment is delivered directly from Germany to the construction project in Finland.
4. For the delivery of the ventilation equipment, EH3 orders air transport from a Finnish transport enterprise and pays them 2,000 euros. The cost of transport is considered as a part of the cost of the ventilation equipment and is added to the cost of equipment delivered by DE1.
5. In Finland, EH3 subcontracts a Finnish construction enterprise (FI2) to install the floor for 5,000 euros.
6. The Finnish enterprise (FI1) pays EH3 15,000 euros for the construction service and additionally for purchased goods and services. The commission for the purchase and resale of goods (in item 2 above) is not a part of the cost of construction services; that is, 2,000 euros (20,000 – 18,000) are not included in the cost of construction.

In foreign trade in services, this is reported as the sale of construction services to a non-resident (partner country FI).

The transactions in the supply of construction services are carried out by:

CUSTOMER: FINLAND (F1)	SUPPLIER: ESTONIA (EH3)	BUILDING: FINLAND	GOODS PURCHASED BY: SUPPLIER (EH3)
-------------------------------	--------------------------------	--------------------------	---

In the "Foreign trade in services" questionnaire, the Estonian construction enterprise (EH3) must report the transactions as follows:

Activities related to construction				Questionnaire fields and entries based on the example					
No	Description of construction services	Cost, euros	Residency of EH3's partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service, euros	Main mode of supply
1	EH3 purchases goods in Estonia, takes them to Finland for the construction project and invoices F1	10,000	EE	S	T44EKVV00	Goods purchased in Estonia for construction abroad	FI	10,000	4
2	EH3 purchases construction goods in Finland	18,000	FI	O	T44VKV00	Goods purchased abroad for construction abroad	FI	18,000	4
	EH3 purchases construction goods in Finland	15,000	FI	P	T44VKV00	Goods purchased abroad for construction abroad	FI	18,000	4
	EH3 sells the goods purchased in Finland to F1	20,000	FI	S	T44VKV00	Goods purchased abroad for construction abroad	FI	20,000	4
3	EH3 purchases ventilation equipment from Germany	7,000	DE	P	T44VKV00	Goods purchased abroad for construction abroad	DE	7,000	4
	EH3 sells the ventilation equipment to F1 (price includes cost of transport)		FI	S	T44VKV00	Goods purchased abroad for construction abroad	FI	9,000	4
4	EH3 orders air transport for the delivery of the ventilation equipment from Germany to Finland	2,000	FI	P	T5121V00	Freight air transport services (incl. forwarding) abroad / to abroad	FI	2,000	1
	EH3 sells the transport of the ventilation equipment to F1			<i>It was agreed that the cost of transport would be considered as a part of the cost of equipment; therefore, it is reported in the row for the sale of ventilation equipment.</i>					
5	EH3 subcontracts the floor installation to a Finnish supplier	5,000	FI	P	T41VT000	Building construction works abroad	FI	5,000	4
	EH3 sells to F1 the floor installation service subcontracted to the Finnish supplier		FI	S	T41VT000	Building construction works abroad	FI	5,000	4
6	Cost of the building construction works supplied by EH3	15,000	FI	S	T41VT000	Building construction works abroad	FI	15,000	4

EH3 supplies the following to F1: construction services (15,000 euros), goods purchased in Estonia (10,000 euros), goods purchased in Finland (actual purchase price 18,000 euros and resale price 20,000 euros), floor installation subcontracted in Finland (5,000 euros), equipment purchased in Germany (7,000 euros) and transport of the equipment (2,000 euros).

Thus, under the purchase (O) of construction services from a non-resident, the following entries are required:

- T44VKV00 – goods purchased abroad; in this example, goods purchased in Finland and Germany. The country code for the country where the goods were bought must be specified in the field "Code of non-resident's country". If the Estonian construction enterprise is required to complete the Intrastat questionnaire, these transactions are not reported in the Intrastat questionnaire because the goods did not cross the Estonian border.
- T41VT000 – purchase of construction services abroad; in this example, the floor installation service provided by the Finnish enterprise.
- T5121V00 – air transport of the equipment from Germany to Finland.

Under the supply (M) of construction services to a non-resident (F11), the following entries are required:

- T41VT000 – cost of construction in Finland, including the construction services supplied by EH3 and the sale to F11 of the floor installation subcontracted by EH3. These transactions can be reported as a total, although they are shown as separate entries in this example for clarity.
- T44EKV00 – cost of goods purchased by EH3 in Estonia for the supply of construction services, as invoiced by EH3 to the non-resident customer. If the construction enterprise is required to complete the Intrastat questionnaire, the goods taken from Estonia to Finland should be reported as goods exported. The country code for the country where the construction takes place is specified in the field “Code of non-resident’s country” – in this example, FI.
- T44VKV00 – the sale of goods purchased abroad (in Finland and Germany) to a non-resident (the customer); in this example, a Finnish enterprise. To the cost of equipment purchased in Germany is added the cost of air transport because, as previously agreed with the customer, the cost of transport was a part of the cost of the equipment. If there is no such agreement and the supplier of construction services invoices each item separately, EH3 must report the sale of the air transport service for the ventilation equipment under code T5121V00 “Freight air transport services (incl. forwarding) abroad / to abroad”.

In this case, the mode of supply for construction services is 4, i.e. presence of natural persons. The Estonian construction enterprise goes to Finland to provide the service to the Finnish enterprise in its country. The purchase of the air transport service is cross-border trade (mode 1).

Example 2:

An Estonian enterprise (EE1) purchases construction services from a Finnish enterprise (F11) and asks the Finnish enterprise to construct a building in Finland. This transaction is not reported in the foreign trade in services questionnaire.

The transactions in the supply of construction services are carried out by:

CONSUMER: ESTONIA (EE1)	SUPPLIER: FINLAND (F11)	BUILDING: FINLAND	GOODS PURCHASED BY: SUPPLIER (F11)
------------------------------------	------------------------------------	--------------------------	---

If the Estonian economic unit sets up a foreign affiliate or branch in Finland and has a building constructed for it in Finland, the subsidiary is considered a non-resident. In effect, the construction services are supplied to a non-resident (subsidiary of the Estonian enterprise) by a non-resident (the Finnish construction enterprise), and **these transactions do not have to be reported in the “Foreign trade in services” questionnaire.**

Still, for the Estonian economic unit, this represents a direct investment (a foreign affiliate) and the construction-related liabilities and receivables between the parent undertaking and the affiliate must be reported in the balance of payments report submitted to Eesti Pank. If a foreign affiliate or branch is not set up, the construction activities must be reported in section 1.14. “Real estate abroad” in the balance of payments report submitted to Eesti Pank.

4.2.2 CONSTRUCTION IN ESTONIA

The execution of building construction, civil engineering and special construction works **in Estonia** should be reported by:

- **Estonian economic units** who order construction services in Estonia from non-resident suppliers. In this case, the country code for the non-resident supplier must be specified in the field “Code of non-resident’s country”.
- **Estonian construction enterprises** who are subcontracted by non-resident construction enterprises to provide construction services in Estonia. In this case, the country for the non-resident main contractor must be specified in the field “Code of non-resident’s country”.
- **Estonian construction enterprises** who subcontract non-resident construction enterprises to provide construction services for a construction project in Estonia. In this case, the country code for the non-resident service provider must be specified in the field “Code of non-resident’s country”.

In addition to construction services, the respondent must report the following as separate entries:

- The cost of goods purchased by a non-resident in Estonia for a construction project in Estonia. Although the goods were purchased in Estonia, the country code for the supplier must be specified in the field "Code of non-resident's country".
- The cost of goods purchased by the subcontractor in Estonia for a construction project in Estonia, and then sold to the non-resident. The country code for the customer must be specified in the field "Code of non-resident's country".
- The cost of goods purchased abroad for a construction project in Estonia – if the construction services are provided in Estonia, the respondent must report here the cost of goods purchased outside of Estonia. The code of the country where the goods were bought must be specified in the field "Code of non-resident's country".
- If non-residents are subcontracted to provide services for a construction project in Estonia, these must be reported as construction services purchased in Estonia. In the case of services purchased from third-country suppliers, the country code for the supplier must be specified in the field "Code of non-resident's country".

Example 1:

An Estonian enterprise (EE1) purchases construction services from a Finnish construction enterprise (F1) and asks the Finnish enterprise to construct a building in Estonia:

1. F1 purchases goods for construction in Estonia for 10,000 euros and sells the goods to the customer (EE1).
2. F1 purchases goods in Finland for 20,000 euros and sells the goods to the customer (EE1).
3. F1 purchases ventilation equipment in Germany for 7,000 euros, to be delivered from Germany to Estonia.
4. F1 subcontracts an Estonian construction enterprise (EH3) to install the floors for 5,000 euros.
5. EE1 pays F1 15,000 euros for the construction services and also pays the cost of the purchased goods and services.

In foreign trade in services, this is reported as the purchase of construction services from a non-resident (partner country FI).

The transactions in the purchase of construction services are carried out by:

CUSTOMER: ESTONIA (EE1)	SUPPLIER: FINLAND (F1)	BUILDING: ESTONIA	GOODS PURCHASED BY: SUPPLIER (F1)
--------------------------------	-------------------------------	--------------------------	--

If the invoice submitted to the Estonian enterprise (EE1) by the Finnish construction enterprise (F1) shows all transactions as separate entries, the **Estonian enterprise (EE1) must report the transactions in the "Foreign trade in services" questionnaire as follows:**

Activities related to construction				Questionnaire fields and entries based on the example					
No	Description of construction services	Cost, euros	Residency of EE1's partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service, euros	Main mode of supply
1	EE1 purchases from FI the goods purchased in Estonia	10,000	EE	0	T44EKE00	Goods purchased in Estonia for a construction project in Estonia	FI	10,000	4
2	EE1 purchases from F11 the goods purchased in Finland	20,000	FI	0	T44VKE00	Goods purchased in Estonia for a construction project in Estonia	FI	20,000	4
3	EE1 purchases from F11 the ventilation equipment bought in Germany	7,000	DE	0	T44VKE00	Goods purchased abroad for a construction project in Estonia	DE	7,000	4
4	F11 subcontracts EH3 in Estonia for the floor installation and invoices EE1	5,000	EE	<i>Reported in the row for cost of construction services T41ET000 as one entry.</i>					
5	EE1 pays F11 for the construction services	15,000	FI	0	T41ET000	Building construction works in Estonia	FI	20,000	4

If the invoice submitted by FI1 shows the cost of construction services together with the cost of goods (57,000 euros in this example), the entire sum must be reported under T41ET000 "Building construction works in Estonia".

In this case, the mode of supply is mode 4, i.e. presence of natural persons. The Finnish construction enterprise comes to Estonia to supply construction services; from their perspective, the services are used/provided in a foreign country.

EH3, subcontracted by FI1 for the floor installation, should report the transaction as follows:

Activities related to construction				Questionnaire fields and entries based on the example					
No	Description of construction services	Cost, euros	Residency of EE3's partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service, euros	Main mode of supply
4	EH3 provides the service of floor installation to FI1 for a construction project in Estonia	5,000	FI	M	T41ET000	Building construction works in Estonia	FI	5,000	2

In this case, the mode of supply is mode 2, i.e. consumption abroad. The Finnish construction enterprise comes to Estonia where it is supplied the floor installation service – the service is supplied in the supplier's country.

Example 2:

An Estonian construction enterprise (EH3) is subcontracted by a Finnish construction enterprise (FI1, main contractor), which supplies construction services in Estonia to an Estonian enterprise (EE1).

1. EH3 purchases goods in Estonia for 5,000 euros and sells them to the main contractor FI1.
2. EH3 purchases goods in Germany for 10,000 euros and sells them to the main contractor FI1.
3. FI1 pays EH3 13,000 euros for the construction services and additionally the cost of goods purchased for construction.

The transactions in the supply of construction services are carried out by:

CUSTOMER: FINLAND (FI1)	SUPPLIER: ESTONIA (EH3)	BUILDING: ESTONIA	GOODS PURCHASED BY: SUPPLIER (EH3)
--------------------------------	--------------------------------	--------------------------	---

If the invoice submitted to the Finnish construction enterprise (FI1) by the Estonian construction enterprise (EH3) shows all transactions as separate entries, the **Estonian construction enterprise (EH3)** must report the transactions in the "Foreign trade in services" questionnaire as follows:

Activities related to construction				Questionnaire fields and entries based on the example					
No	Description of construction services	Cost, euros	Residency of EH3's partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service, euros	Main mode of supply
1	EH3 purchases goods in Estonia	5,000	EE	<i>Not reported: transaction between residents</i>					
	EH3 sells the goods purchased in Estonia to the main contractor FI1	5,000	FI	M	T44EKE00	Goods purchased in Estonia for a construction project in Estonia	FI	5,000	2
2	EH3 purchases construction goods in Germany	10,000	DE	O	T44VKE00	Goods purchased abroad for a construction project in Estonia	DE	10,000	2
	EH3 sells the goods purchased in Germany to the main contractor FI1	10,000	FI	M	T44VKE00	Goods purchased abroad for a construction project in Estonia	FI	10,000	2
3	Cost of construction services supplied by EH3 as a subcontractor	13,000	FI	M	T41ET000	Building construction works in Estonia	FI	13,000	2

Example 3:

An **Estonian construction enterprise (EH3)** constructs a building **in Estonia** at the request of an **Estonian enterprise (EE1)**, and EH3 subcontracts a **Finnish construction enterprise (FI1)**.

1. EH3 purchases goods (for construction) in Estonia for 5,000 euros.
2. EH3 purchases goods in Finland for 10,000 euros.
3. EH3 subcontracts the Finnish enterprise (FI1) to install the roof for 15,000 euros.
4. EE1 pays EH3 13,000 euros for the construction services and additionally the cost of goods and services purchased for construction.

The transactions in the supply of construction services are carried out by:

CUSTOMER: ESTONIA (EE1)	SUPPLIER: ESTONIA (EH3)	BUILDING: ESTONIA	GOODS PURCHASED BY: SUPPLIER (EH3)
------------------------------------	------------------------------------	--------------------------	---

The Estonian construction enterprise (EH3) must report the transactions in the “Foreign trade in services” questionnaire as follows:

Activities related to construction				Questionnaire fields and entries, based on the example					
No	Description of construction services	Cost, euros	Residency of EH3's partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service, euros	Main mode of supply
1	EH3 purchases goods (for construction) in Estonia	5,000	EE	<i>Not reported: transaction between residents</i>					
2	EH3 purchases goods (for construction) in Finland	10,000	FI	<i>Not reported: transaction between residents</i>					
3	EH3 subcontracts a Finnish enterprise to install the roof	15,000	FI	0	T41ET000	Building construction works in Estonia	FI	15,000	4
4	EE1 pays EH3 for the construction services	13,000	EE	<i>Not reported: transaction between residents</i>					
	EE1 pays EH3 for the goods (for construction)	15,000	EE	<i>Not reported: transaction between residents</i>					
	EE1 pays EH3 for installing the roof	15,000	EE	<i>Not reported: transaction between residents</i>					

EH3 reports only the roof installation subcontracted to FI1, as a service supplied by a non-resident (Finnish enterprise) for building construction works in Estonia.

In this case, the mode of supply is mode 4, i.e. presence of natural persons. The Finnish construction enterprise comes to Estonia to provide the roof installation service; for them, this means the supply of services in a foreign country.

In this example, the Estonian enterprise EE1, the customer, does not have to complete the questionnaire as, from their perspective, this is a transaction between residents. If EE1 had been the one to subcontract the roof installation to a Finnish enterprise, EE1 would be required to report this transaction in the questionnaire, just like EH3.

4.3 REPORTING TRANSPORT SERVICES IN THE QUESTIONNAIRE

Transport-related services may be divided into:

- services related to the transport of passengers;
- services related to the carriage of goods;
- transport support services.

The main codes for transport-related services are:

Code of service and other transaction	Description of service
PASSENGER TRANSPORT SERVICES	
T491MR00	International passenger rail transport services by a non-resident carrier
T491R000	International passenger rail transport services by a resident carrier
T491YRV0	Rental of rail transport vehicle with crew for passengers transport
T49311MR	Domestic passenger rail transport services by a non-resident carrier
T49311R0	Domestic passenger rail transport services by a resident carrier
T49312MR	Domestic passenger land transport services by a non-resident carrier
T49312R0	Domestic passenger land transport services by a resident carrier
T4939MR0	International passenger land transport services by a non-resident carrier
T4939R00	International passenger land transport services by a resident carrier
T49YRV00	Rental of road transport vehicle with crew for passengers transport
T501MR00	Sea and coastal passenger water transport services by a non-resident carrier
T501R000	Sea and coastal passenger water transport services by a resident carrier
T501YRV0	Rental of sea transport vehicle with crew for passengers transport
T503MR00	Inland passenger water transport services by a non-resident carrier
T503R000	Inland passenger water transport services by a resident carrier
T511MR00	Passenger air transport services by a non-resident carrier
T511R000	Passenger air transport services by a resident carrier
T511YRV0	Rental of air transport vehicle with crew for passengers transport
FREIGHT TRANSPORT SERVICES	
T492E000	Freight rail transport services (incl. forwarding) in Estonia / to Estonia
T492V000	Freight rail transport services (incl. forwarding) abroad / to abroad
T492YRV0	Rental of rail transport vehicle with crew for goods freight
T494E000	Freight transport services (incl. forwarding) by road in Estonia / to Estonia
T494V000	Freight transport services (incl. forwarding) by road abroad / to abroad
T4950000	Transport services via pipeline
T49YKV00	Rental of road transport vehicle with crew for goods freight
T502E000	Sea and coastal freight transport services (incl. forwarding) in Estonia / to Estonia
T502V000	Sea and coastal freight transport services (incl. forwarding) abroad / to abroad
T502YKV0	Rental of sea transport vehicle with crew for goods freight
T504E000	Inland freight water transport services (incl. forwarding) in Estonia / to Estonia
T504V000	Inland freight water transport services (incl. forwarding) abroad / to abroad
T5121E00	Freight air transport services (incl. forwarding) in Estonia / to Estonia
T5121V00	Freight air transport services (incl. forwarding) abroad / to abroad
T5121YRV	Rental of air transport vehicle with crew for goods freight
T5122000	Space transport services
T5300000	Postal and courier services
TRANSPORT SUPPORT SERVICES	
TRANSPORT ENTERPRISE (NACE codes 49–52) SUPPORT SERVICES	
T5221100	Services incidental to rail transport (incl. storage services of transport companies)
T5221200	Services incidental to road transport (incl. storage services of transport companies)
T5221300	Services incidental to transportation via pipelines
T5222000	Services incidental to water transport (incl. storage services of transport companies)
T5223000	Services incidental to air transport (incl. storage services of transport companies)
NON-TRANSPORT ENTERPRISES (NACE codes other than 49–52) SUPPORT SERVICES	
T5229000	Other support services for transport (incl. storage services of non-transport companies)

Non-transport enterprises must report transport services, if there is a separate invoice issued for the cost of transportation – in this case, it is considered a service. If the transportation cost is on the same invoice as the goods, it is added to the value of the goods and should be reported in Intrastat (if the economic entity has the obligation to submit data with the Intrastat questionnaire).

Combined transport is often used for transport operations. As a rule, the customer of such transport (non-transport enterprise – EE) does not know the cost of transport separately for each type of transport, and in this case, the non-transport enterprise should use the code with the highest share to describe such carriage.

Example 1:

A full truck load (trailer) transport is ordered from Tallinn to Rovaniemi. The service is ordered from a road transport enterprise. The goods are loaded onto the trailer, the truck travels by ferry from Tallinn to Helsinki and from there by road to Rovaniemi.

The transport type is road transport, i.e. land transport.

Example 2:

In order to save costs, transport of goods by land from Tartu to Frankfurt and by air transport from Frankfurt to Beijing is ordered.

The transport type is air transport.

The transport enterprise orders all parts of the service separately to fulfil the order and can use the code corresponding to each service type.

Most transport services are mode 1, i.e. cross-border trade, with the exception of ancillary services provided to domestic carriers in foreign ports or to foreign carriers in home ports (see [3.5. THE MAIN MODE OF SUPPLY](#)).

4.3.1 TRANSPORT ENTERPRISE SELLS TRANSPORT SERVICES

The following are some examples of how Estonian transport enterprises should report in the questionnaire the transport services they provide.

If goods are transported abroad from Estonia:

Example 1:

An Estonian transport enterprise (ET4) receives the following orders:

1. A Lithuanian enterprise (LT1) orders land freight transport from Estonia to Lithuania for 1,000 euros.
2. A Russian enterprise (RU1) orders rail freight transport from Estonia to Russia for 1,500 euros.
3. The Lithuanian enterprise (LT1) orders freight transport by ship from Estonia to Lithuania for 2,000 euros.
4. The Lithuanian enterprise (LT1) orders freight transport by air from Estonia to Lithuania for 2,500 euros.
5. An Estonian construction enterprise (EH3) orders land freight transport from Estonia to Latvia for 800 euros.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of carriage of goods ordered	Cost, euros	Residency of partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	LT1 orders land transport from Estonia to Lithuania	1,000	LT	M	T494V000	Freight transport services (incl. forwarding) by road abroad / to abroad	LT	1,000	1
2	RU1 orders rail transport from Estonia to Russia	1,500	RU	M	T492V000	Freight rail transport services (incl. forwarding) abroad / to abroad	RU	1,500	1
3	LT1 orders sea transport from Estonia to Lithuania	2,000	LT	M	T502V000	Sea and coastal freight transport services (incl. forwarding) abroad / to abroad	LT	2,000	1
4	LT1 orders air transport from Estonia to Lithuania	2,500	LT	M	T5121V00	Freight air transport services (incl. forwarding) abroad / to abroad	LT	2,500	1
5	EH3 orders land transport from Estonia to Latvia	800	EE	<i>Not reported: transaction between residents</i>					

In the case of this example, we presume that ET4 provided the services itself and therefore transactions are reported as sale of service (M). If ET4 ordered a shipment to a non-resident from another economic unit providing the same service:

- find out whether the service was purchased from a resident or non-resident;

- if the service was purchased from a resident, it is not included in the questionnaire;
- if the service was purchased from a non-resident, it is reported separately as a purchase of service (O).

If the carriage of goods takes place abroad, transactions are reported similarly to the previous example:

Example 2:

An Estonian transport enterprise provides the following services:

1. A Lithuanian enterprise (LT1) orders land freight transport from Latvia to Lithuania for 1,000 euros.
2. A Russian enterprise (RU1) orders rail freight transport from Russia to Ukraine for 1,500 euros.
3. The Lithuanian enterprise (LT1) orders freight transport by ship from Latvia to Lithuania for 2,000 euros.
4. The Lithuanian company (LT1) orders freight transport by air from Latvia to Lithuania for 2,500 euros.
6. An Estonian construction enterprise (EH3) orders land freight transport from Lithuania to Latvia for 800 euros.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of ordered transport	Cost, euros	Residency of partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	LT1 orders land transport from Latvia to Lithuania	1,000	LT	M	T494V000	Freight transport services (incl. forwarding) by road abroad / to abroad	LT	1,000	1
2	RU1 orders rail transport from Russia to Ukraine	1,500	RU	M	T492V000	Freight rail transport services (incl. forwarding) abroad / to abroad	RI	1,500	1
3	LT1 orders sea transport from Latvia to Lithuania	2,000	LT	M	T502V000	Sea and coastal freight transport services (incl. forwarding) abroad / to abroad	LT	2,000	1
4	LT1 orders air transport from Latvia to Lithuania	2,500	LT	M	T5121V00	Freight air transport services (incl. forwarding) abroad / to abroad	LT	2,500	1
5	EH3 orders land transport from Lithuania to Latvia	800	EE	<i>Not reported: transaction between residents</i>					

Example 3:

A British enterprise (GB1) orders the following services from an Estonian transport enterprise (ET4) for passenger transport:

1. Rental of a plane with crew for a passenger flight from Tallinn to Warsaw for 10,000 euros. ET4 orders the transport from a Lithuanian enterprise (LT1).
2. Catering for passengers on board the aircraft for 500 euros. ET4 orders the food from an Estonian enterprise (EE1).
3. Airport charges in the amount of 250 euros in Warsaw and 150 euros in Tallinn.
4. GB1 pays 12,000 in total for the ordered services.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of ordered transport	Cost, euros	Residency of partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	An aircraft is rented with crew from LT1	10,000	LT	O	T511YRVO	Rental of air transport vehicle with crew for passengers transport	LT	10,000	1
2	Catering is ordered from EE1	500	EE	<i>Not reported: transaction between residents</i>					
3	Airport charges in Warsaw	250	PL	O	T5223000	Services incidental to air transport (incl. storage services of transport companies)	PL	250	1
4	Airport charges in Tallinn	150	EE	<i>Not reported: transaction between residents</i>					
5	GB1 pays for the service to ET4	12,000	GB	M	T511MR00	Passenger air transport services by a non-resident carrier	GB	12,000	1

4.3.2 ESTONIAN TRANSPORT ENTERPRISE PURCHASES TRANSPORT SERVICES

If a transport enterprise orders transport services from a non-resident partner:

Example 1:

An Estonian enterprise (EE1) orders the transportation of goods from Beijing (China) to Võru (Estonia) from an Estonian transport enterprise (ET4), paying 3,250 euros in total. ET4 orders the following services:

1. Transport of a sea container from Shanghai to Beijing to Shanghai from a Chinese transport enterprise for 300 euros.
2. Maritime transport on a Danish shipping line Shanghai-Antwerp-Klaipeda for 1,800 euros.
3. Container storage service from a Lithuanian enterprise for 200 euros.
4. Sending the original bill of lading to Klaipeda with an Estonian courier company for 30 euros.
5. Transport of the sea container from Klaipeda to Võru from a Lithuanian transport enterprise for 500 euros.
6. Cleaning of the sea container from a Latvian enterprise for 100 euros and repair of holes of the container for 150 euros.

ET4 should report the transactions as follows:

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of ordered transport	Cost, euros	Residency of partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	ET4 orders land transport of container in China	300	CN	O	T494E000	Freight transport services (incl. forwarding) by road in Estonia / to Estonia	CN	300	1
2	ET4 orders sea transport of container from China to Lithuania	1,800	DK	O	T502E000	Sea and coastal freight transport services (incl. forwarding) in Estonia / to Estonia	DK	1800	1
3	ET4 orders storage of container in Lithuania	200	LT	O	T5222000	Services incidental to water transport (incl. storage services of transport companies)	LT	200	2
4	ET4 orders sending of documents from Estonia to Lithuania	30	EE	<i>Not reported: transaction between residents</i>					
5	ET4 orders land transport of container from Lithuania to Estonia	500	LT	O	T494E000	Freight transport services (incl. forwarding) by road in Estonia / to Estonia	LT	500	1
6	ET4 orders cleaning and repair of container	250	LV	O	T5222000	Services incidental to water transport (incl. storage services of transport companies)	LV	250	2
7	ET4 service fee (3,250 less costs) for intermediation of transport services	170	EE	<i>Not reported: transaction between residents</i>					
8	EE1 pays for transport service to ET4	3,250	EE	<i>Not reported: transaction between residents</i>					

Although most of the transport operations take place abroad (e.g. land transport of the container from Shanghai to Beijing to Shanghai, etc.), the final destination is Võru, and therefore, the components of this transport are considered as a freight service to Estonia and the codes T494E000 and T502E are used respectively.

Container storage and cleaning/repair service are considered consumption abroad (mode 2): the container was stored in Lithuania and repaired/cleaned in Latvia.

4.3.4 NON-TRANSPORT ENTERPRISE PURCHASES TRANSPORT SERVICES

The following are some examples of how Estonian economic entities should report in the questionnaire the transport services they have purchased.

If goods are transported from abroad to Estonia:

Example 1:

An Estonian enterprise (EE1) orders the following freight services:

1. Land transport from Lithuania to Estonia from a Lithuanian enterprise (LT1) for 1,000 euros.
2. Rail transport from Russia to Estonia from a Russian enterprise (RU1) for 1,500 euros.
3. Maritime transport from Lithuania to Estonia from the Lithuanian enterprise (LT1) for 2,000 euros.
4. Air transport from Lithuania to Estonia from the Lithuanian enterprise (LT1) for 2,500 euros.
5. Land transport from Latvia to Estonia from an Estonian transport enterprise (ET4) for 800 euros.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of ordered transport	Cost, euros	Residency of partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	Lithuania-Estonia land transport by LT1	1,000	LT	0	T494E000	Freight transport services (incl. forwarding) by road in Estonia / to Estonia	LT	1,000	1
2	Russia-Estonia rail transport by RU1	1,500	RU	0	T492E000	Freight rail transport services (incl. forwarding) in Estonia / to Estonia	RU	1,500	1
3	Lithuania-Estonia sea transport by LT1	2,000	LT	0	T502E000	Sea and coastal freight transport services (incl. forwarding) in Estonia / to Estonia	LT	2,000	1
4	Lithuania-Estonia air transport by LT1	2,500	LT	0	T5121E00	Freight air transport services (incl. forwarding) in Estonia / to Estonia	LT	2,500	1
5	Latvia-Estonia land transport by ET4	800	EE	<i>Not reported: transaction between residents</i>					

If goods are transported from Estonia to abroad:

Example 2:

An Estonian enterprise (EE1) orders the following freight services:

1. Land transport from Estonia to Lithuania from a Lithuanian enterprise (LT1) for 1,000 euros.
2. Rail transport from Estonia to Russia from a Russian enterprise (RU1) for 1,500 euros.
3. Maritime transport from Estonia to Lithuania from the Lithuanian enterprise (LT1) for 2,000 euros.
4. Air transport from Estonia to Lithuania from the Lithuanian enterprise (LT1) for 2,500 euros.
5. Land transport from Estonia to Latvia from an Estonian transport enterprise (ET4) for 800 euros.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of ordered transport	Cost, euros	Residency of partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	Estonia-Lithuania land transport by LT1	1,000	LT	0	T494V000	Freight transport services (incl. forwarding) by road abroad / to abroad	LT	1,000	1
2	Estonia-Russia rail transport by RU1	1,500	RU	0	T492V000	Freight rail transport services (incl. forwarding) abroad / to abroad	RU	1,500	1
3	Estonia-Lithuania sea transport by LT1	2,000	LT	0	T502V000	Sea and coastal freight transport services (incl. forwarding) abroad / to abroad	LT	2,000	1
4	Estonia-Lithuania air transport by LT1	2,500	LT	0	T5121V00	Freight air transport services (incl. forwarding) abroad / to abroad	LT	2,500	1
5	Estonia-Latvia land transport by ET4	800	EE	<i>Not reported: transaction between residents</i>					

If goods are transported abroad:

Example 3:

An Estonian enterprise (EE1) orders the following freight services:

1. Land transport from Latvia to Lithuania from a Lithuanian enterprise (LT1) for 1,000 euros.
2. Rail transport from Russia to Ukraine from a Russian enterprise (RU1) for 1,500 euros.
3. Maritime transport from Latvia to Lithuania from the Lithuanian enterprise (LT1) for 2,000 euros.
4. Air transport from Latvia to Lithuania from the Lithuanian enterprise (LT1) for 2,500 euros.
5. Land transport from Lithuania to Latvia from an Estonian transport enterprise (ET4) for 800 euros.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of ordered transport	Cost, euros	Residency of partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	Latvia-Lithuania land transport by LT1	1,000	LT	0	T494V000	Freight transport services (incl. forwarding) by road abroad / to abroad	LT	1,000	1
2	Russia-Ukraine rail transport by RU1	1,500	RU	0	T492V000	Freight rail transport services (incl. forwarding) abroad / to abroad	RU	1,500	1
3	Latvia-Lithuania sea transport by LT1	2,000	LT	0	T502V000	Sea and coastal freight transport services (incl. forwarding) abroad / to abroad	LT	2,000	1
4	Latvia-Lithuania air transport by LT1	2,500	LT	0	T5121V00	Freight air transport services (incl. forwarding) abroad / to abroad	LT	2,500	1
5	Lithuania-Latvia land transport by ET4	800	EE	<i>Not reported: transaction between residents</i>					

If part of the transport takes place abroad and a part in Estonia:

Example 4:

An Estonian enterprise (EE1) orders the following freight services:

1. Land transport from a Lithuanian enterprise (LT1), where part of the goods are transported from Lithuania to Latvia and some to Estonia. The total cost of land transport is 1,500 euros, of which 1,000 euros is the cost of transport to Estonia.
2. Rail transport from a Russian enterprise (RU1), where part of the goods are transported from Russia to Ukraine and some to Estonia. The cost of rail transport to Ukraine is 1,500 and to Estonia 1,000 euros.
3. Sea transport from the Lithuanian enterprise (LT1), where part of the goods are transported from Lithuania to Latvia and some to Estonia. The cost of sea transport to Latvia is 2,000 euros and to Estonia 3,000 euros.
4. Air transport from the Lithuanian company (LT1), where part of the goods are transported from Lithuania to Latvia and some to Estonia. The total cost of air transport is 2,500 euros. Transportation of goods to Estonia costs 1,500 euros.

DESCRIPTION OF SERVICES				QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
No	Description of ordered transport	Cost, euros	Residency of partner	Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
1	Latvia-Lithuania land transport by LT1	500	LT	0	T494V000	Freight transport services (incl. forwarding) by road abroad / to abroad	LT	500	1
	Lithuania-Estonia land transport by LT1	1,000	LT	0	T494E000	Freight transport services (incl. forwarding) by road in Estonia / to Estonia	LT	1,000	1
2	Russia-Ukraine rail transport by RU1	1,500	RU	0	T492V000	Freight rail transport services (incl. forwarding) abroad / to abroad	RU	1,500	1
	Russia-Estonia rail transport by RU1	1,000	RU	0	T492E000	Freight rail transport services (incl. forwarding) in Estonia / to Estonia	RU	1,000	1
3	Lithuania-Latvia sea transport by LT1	2,000	LT	0	T502V000	Sea and coastal freight transport services (incl. forwarding) abroad / to abroad	LT	2,000	1
	Lithuania-Estonia sea transport by LT1	3,000	LT	0	T502E000	Sea and coastal freight transport services (incl. forwarding) in Estonia / to Estonia	LT	3,000	1
4	Lithuania-Latvia air transport by LT1	1,000	LT	0	T5121V00	Freight air transport services (incl. forwarding) abroad / to abroad	LT	1,000	1
	Lithuania-Estonia air transport by LT1	1,500	LT	0	T5121E00	Freight air transport services (incl. forwarding) in Estonia / to Estonia	LT	1,500	1

In this example, the transport cost of each part of the consignment was known. However, economic units may not have this information.

Example 5:

EE1 orders a full truck load (trailer) transport for the Amsterdam-Vilnius route. In Vilnius, the load is unloaded and a new load is picked up from the same enterprise for EE1 and transported from Vilnius to Tallinn. The total cost of transport is 4,000 euros.

In this case, transport should be divided proportionally between the different service codes. If the transport costs are broken down by different consignments in the economic unit's accounts, this information should be used and the cost of services should be reported according to the accounting entries.

4.4 PROCESSING SERVICES (code of service: T100000–T170000; T190000–T320000, T8292000)

Processing service is a contractual activity, which results in new products or changes in the characteristics of goods (e.g. sewing of clothes, metal treatment, oil refining, vehicle assembly, bottling of liquids, in some cases packaging of goods, preservation of goods, dilution of liquids, etc.). The processor does not own the processed goods. The cost of processing service **does not include the cost of processed goods, but may include the cost of materials added to the goods by the processor.**

If there were various goods purchased to be able to provide the service, their cost is not separately reported in the questionnaire. In the foreign trade in services questionnaire, only the cost of service is reported, incl. the cost of the goods that were a part of the cost of service.

How to differentiate between foreign trade in processing services and foreign trade in goods?

1. If an economic entity sells products that it owns, purchases the materials for production and makes the products, it is considered **export of goods** and it is reported in the Intrastat dispatches questionnaire (if the entity is obligated to submit data with Intrastat) or on the customs declaration.
2. If an economic entity **receives free materials from a customer** and makes products for the customer, then as a rule the rights to the product do not belong to the manufacturer but to the customer and it is considered processing, i.e. **sale of service**.

For example

- A sewing business is sent fabrics, buckram, button ware, etc. and it makes clothes according to the specifications of a customer. The finished products are sent to the customer.
- A customer sends metal details to a metal processing enterprise to be cleaned and painted and the processed products are sent back to the customer.

These are considered "Manufacturing services on physical inputs owned by others" and only the cost of the processing service is to be reported in the foreign trade in services questionnaire. At the same time, the movement of goods should be reported in Intrastat (if the entity is obligated to submit data with Intrastat) or on the customs declaration using the codes 41, 42, 51 or 52. At the time of arrival, the cost of goods imported for processing is reported, and, at the time of dispatch, the cost of the product (cost of the goods imported for processing + cost of additional goods purchased + cost of processing service) is reported.

3. If an economic entity purchases materials and makes products according to the specifications, product descriptions or other information received from a customer (as a rule via the internet), **then from the manufacturer's perspective, it is production of goods as contract service, and from the client's perspective, it means buying in the necessary production capacity.**

For example

- A print file is sent to a printing house. The printing house acquires materials and prints the material into a book or brochure and then sends these to the customer.
- A sewing enterprise receives a technical description and patterns from a customer. The enterprise acquires materials, cuts the fabric according to pattern and sews the products according to the specifications. The finished products are sent to the customer.

In this case, it is considered **foreign trade in goods** and the transactions are to be reported only in Intrastat questionnaire (if the entity is obligated to submit data with Intrastat) or on the customs declaration with the transaction type 11 for both imports and exports. **Such transactions are not reported in the foreign trade in services questionnaire.**

Example 1:

An Estonian sewing enterprise receives fabric and packaging materials (clothes hangers, plastic bags, labels) from a Swedish retail chain. The Estonian sewing enterprise supplies the Swedish enterprise the service of sewing blouses. It also receives from the Swedish enterprise the sewing patterns and descriptions of products. The cost of the sewing service is 20,000 euros, which includes the cost of sewing accessories necessary for the provision of the service.

The provision of the sewing service is reported in the questionnaire as follows:

QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
M	T1400000	Processing services of apparel	SE	20,000	2

Example 2:

An Estonian wine trading enterprise buys wine in barrels from Italy and sends the barrels to Latvia for bottling of the wine. The bottled wine is sent from Latvia to Estonia.

QUESTIONNAIRE FIELDS AND ENTRIES BASED ON THE EXAMPLE					
Transaction in service	Code of service and other transaction	Name of service and other transaction	Code of non-resident's country	Total cost of service	The main mode of supply
0	T1100000	Beverage processing services	LV	5,000	2

5. PUBLICATION OF FOREIGN TRADE IN SERVICES STATISTICS

Foreign trade in services statistics are published in the statistical database https://andmed.stat.ee/en/stat/majandus_valiskaubandus and publications of Statistics Estonia.

At <https://www.stat.ee/en/find-statistics/statistics-theme/economy/foreign-trade> one can:

- read news releases on external trade statistics;
- read electronic publications and articles on foreign trade;
- use the database <https://andmed.stat.ee/en/stat> (foreign trade statistics can be found under “Economy” in the “Foreign trade” subsection);
- use the predefined tables on foreign trade statistics.

More detailed information on foreign trade statistics can be ordered at <https://www.stat.ee/en/find-statistics/request-statistics>.

Foreign trade statistics of European Union countries can be found in Eurostat’s database at <https://ec.europa.eu/eurostat/web/international-trade-in-services/database>.

Foreign trade in services statistics are published on a quarterly basis:

- updates of foreign trade data in the statistical database;
- foreign trade news release on the previous quarter.

ANNEXES

Annex 1. NACE economic activities, service codes and modes of supply

NACE		Code of service in foreign trade in services questionnaire		Main mode of supply		
	Description	Code of service	Description of service	1	2	4
A Agriculture, Hunting and Forestry						
01	Crop and animal production, hunting and related service activities	T0160000	Agricultural and animal husbandry services (except veterinary services)			
		T0170000	Hunting and trapping and related services			
02	Forestry and logging	T0210000	Forest trees and nursery services (incl. support services)			
03	Fishing and aquaculture	T0300700	Support services to fishing and aquaculture			
B MINING AND QUARRYING						
09	Mining support service activities	T0900000	Mining support services			
C MANUFACTURING						
10	Manufacture of food products	T1000000	Food processing services			
11	Manufacture of beverages	T1100000	Beverage processing services			
12	Manufacture of tobacco products	T1200000	Tobacco processing services			
13	Manufacture of textiles	T1300000	Textile processing services			
14	Manufacture of wearing apparel	T1400000	Processing services of wearing apparel			
15	Manufacture of leather and related products	T1500000	Processing services of leather and leather products			
16	Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials	T1600000	Processing services of wood and products of wood and cork			
17	Manufacture of paper and paper products	T1700000	Processing services of paper and paper products			
18	Printing and reproduction of recorded media	T1800000	Printing and reproduction services of recorded media			
19	Manufacture of coke and refined petroleum products	T1900000	Processing services of coke and refined petroleum products			
20	Manufacture of chemicals and chemical products	T2000000	Processing services of chemicals and chemical products			
21	Manufacture of basic pharmaceutical products and pharmaceutical preparations	T2100000	Processing services of basic pharmaceutical products and pharmaceutical preparations			
22	Manufacture of rubber and plastic products	T2200000	Processing services of rubber and plastic products			
23	Manufacture of other non-metallic mineral products	T2300000	Processing services of other non-metallic mineral products			
24	Manufacture of basic metals	T2400000	Processing services of basic metals			
25	Manufacture of fabricated metal products, except machinery and equipment	T2500000	Processing services of fabricated metal products			
26	Manufacture of computer, electronic and optical products	T2600000	Processing services of computer, electronic and optical products			
27	Manufacture of electrical equipment	T2700000	Electrical equipment processing services			
28	Manufacture of machinery and equipment n.e.c	T2800000	Processing services of machinery and equipment n.e.c.			
29	Manufacture of motor vehicles, trailers and semi-trailers	T2900000	Processing services of motor vehicles, trailers and semi-trailers			

NACE		Code of service in foreign trade in services questionnaire		Main mode of supply		
	Description	Code of service	Description of service	1	2	4
30	Manufacture of other transport equipment	T3000000	Processing services of other transport equipment			
31	Manufacture of furniture	T3100000	Processing services related to furniture manufacturing			
32	Other manufacturing	T3200000	Processing services related to other manufacturing			
33	Repair and installation of machinery and equipment	T3310000	Repair services of metal products, machinery and equipment			
		T3320000	Installation services of industrial machinery and equipment			
D ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY						
35	Electricity, gas, steam and air conditioning supply	T3512000	Transmission services of electricity			
		T3513000	Distribution services of electricity			
		T3514000	Trade services of electricity (incl. commissions)			
		T3522000	Distribution services of gaseous fuels through mains			
		T3523000	Trade services of gas through mains (incl. commissions)			
		T3530000	Steam and air conditioning supply services			
E WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES						
36	Water collection, treatment and supply	T3600200	Water treatment and distribution services through mains			
37	Sewerage	T3700100	Sewerage services			
38	Waste collection, treatment and disposal activities; materials recovery	T3800000	Waste collection, treatment and disposal services; materials recovery services			
39	Remediation activities and other waste management services	T3900000	Remediation services and other waste management services			
F CONSTRUCTION						
41	Construction of buildings	T41ET000	Building construction works in Estonia			
		T41VT000	Building construction works abroad			
42	Civil engineering	T42ET000	Civil engineering works in Estonia			
		T42VT000	Civil engineering works abroad			
43	Specialised construction activities	T43ET000	Special construction works in Estonia			
		T43VT000	Special construction works abroad			
	Without NACE code	T44EKE00	Goods purchased in Estonia for a construction project in Estonia			
		T44EKV00	Goods purchased in Estonia for a construction project abroad			
		T44VKE00	Goods purchased abroad for a construction project in Estonia			
		T44VKV00	Goods purchased abroad for a construction project abroad			
G WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES						
45	Wholesale and retail trade and repair of motor vehicles and motorcycles	T4510000	Trade services of motor vehicles			
		T4520000	Maintenance and repair services of motor vehicles			
		T4530000	Trade services of motor vehicle parts and accessories			
		T4540000	Trade services of motorcycles and related parts and accessories			
		T4540500	Maintenance and repair services of motorcycles			
46	Wholesale trade, except of motor vehicles and motorcycles	T4600000	Wholesale trade services			

NACE		Code of service in foreign trade in services questionnaire		Main mode of supply

Annex 3. Legislation governing foreign trade in services

Global legislation

- Trade in services between WTO Members is governed by the Annex to the WTO Agreement – **General Agreement on Trade in Services (GATS)**
- **Manual on Statistics of International Trade in Services 2010 (MSITS 2010)**

European Union legislation

- **Regulation (EC) No 184/2005 of the European Parliament and of the Council** of 12 January 2005 on Community statistics concerning balance of payments, international trade in services and foreign direct investment
- **Commission Regulation (EU) No 1227/2010** of 20 December 2010 amending Regulation (EC) No 1055/2008 implementing Regulation (EC) No 184/2005 of the European Parliament and of the Council as regards quality criteria and quality reporting for balance of payments statistics
- **Commission Regulation (EU) No 555/2012** of 22 June 2012 amending Regulation (EC) No 184/2005 of the European Parliament and of the Council on Community statistics concerning balance of payments, international trade in services and foreign direct investment, as regards the updating of data requirements and regulations
- **Regulation (EU) 2016/1013 of the European Parliament and of the Council** of 08 June 2016 amending Regulation (EC) No 184/2005 on Community statistics concerning balance of payments, international trade in services and foreign direct investment
- **Regulation (EU) 2019/2152 of the European Parliament and of the Council** of 27 November 2019 concerning European business statistics and repealing ten legal acts in the field of business statistics
- **Commission Implementing Regulation (EU) 2020/1197** of 30 July 2020 laying down technical specifications and procedures pursuant to Regulation (EU) 2019/2152 of the European Parliament and of the Council concerning European business statistics and repealing 10 legal acts in the field of business statistics

Estonian legislation

- **Official Statistics Act**, passed 10.06.2010; published: RT I, 11.03.2022, 2.
- **List of statistical activities of Statistics Estonia in 2022–2026**, passed 07.02.2022; published: RT III, 09.02.2022, 1.
- **Submission of data required for the compilation of the balance of payments**, passed 22.10.2013; published: RT I, 13.07.2018, 13.
