### GENERAL DEFINITIONS AND EXPLANATIONS

Carcass weight or slaughter weight of a bovine animal — the weight of a slaughtered bovine animal's cold body after having been skinned, bled and eviscerated, after removal of the genital organs with the attached muscles and the udder and the mammary fat, after the feet have been severed at the carpometacarpal or tarsometatarsal joints and the removal of the head.

Carcass weight or slaughter weight of pigs — the weight of a slaughtered pig's cold body after having been bled and eviscerated and after the removal of kidneys and flare fat, the bristles, the genital organs, the tongue, the diaphragm and the hooves.

Carcass weight or slaughter weight of sheep and goats — the weight of a slaughtered sheep's or goat's cold body after having been skinned, bled and eviscerated (except the kidneys, kidney fats), and after the removal of the head (separated at the atlanto-occipital joint), the feet (severed at the carpo-metacarpal or tarsometatarsal joints), the tail (severed between the sixth and seventh caudal vertebrae) and the genital organs (including the udder).

Please make sure that you enter data in the correct cell. If you enter alphabetical characters in a number field, a corresponding error message is displayed. In the case of some fields, logic (arithmetic) checks have been applied to prevent data entry mistakes. If there is a conflict in the entered data or they conflict with pre-filled data, an error message appears when the table is checked. In the case of errors, review the data carefully and make corrections.

To submit the questionnaire, click the button „Check“, which applies inter-table checks. Once you have corrected the possible errors, click the button „Confirm“.
