

Production (data as at 15th of September)

In online questionnaire, fields have been prefilled for agricultural holdings which have submitted data to ARIB. Please double check the prefilled fields, correct if necessary and indicate the reason for amendment in the period comment field. The questionnaire Production is used for collecting data about the yield harvested by 15th of Sept of the current year. If harvesting has not started by the time the questionnaire is submitted, the harvested area is not indicated, instead, an explanation is indicated in column 5: "Harvesting has not started yet".

Explanation for production (column 5) is only filled in if the crop has been cultivated but there is no production (crop failure, destroyed) or it is not indicated (harvesting not started yet) or the yield is higher or lower than normal. If by the time of filling out the questionnaire it is not possible to indicate the total production in net weight, indicate it in undried and uncleaned weight.
