2. TAXI SERVICE

Data on taxi transport are summed up by quarter. Enterprises providing taxi ordering or dispatcher service shall fill in column "Average registered number of taxis". If the company has no kept records about the actual volume of work, the estimated passenger turnover can be calculated by multiplying the number of passengers transported in the quarter by the average length of the journey (km).

		Number of passengers, thousand passengers	Passenger turnover, thousand passenger-km	Total distance travelled, thousand km	incl. for hire or reward, thousand km	Average registered number of taxis (prefilled)
		1	2	3	4	5
Taxi operation	15					

3. TIME SPENT ON FILLING OUT THE QUESTIONNAIRE (incl. for preparing the data, only for the 3rd quarter)

Please estimate how much time you spent on filling out the questionnaire (incl. time spent on reading the instructions, collecting and preparing data). Record the total time spent by all employees.

Time spent	Hours	Minutes
Please indicate the hours and minutes separately. For example, if it took 1.5 hours (i.e. 90 minutes) to complete the questionnaire, you should enter 1 in the hours field and 30 in the minutes field.
